FOR RELEASE: July 9, 1957

SERIES: M22T.1-1-7 (formerly M15A)

COTTON BROAD WOVEN GOODS FIRST QUARTER 1957 QUARTERLY PRODUCTION IN THE UNITED STATES

Prepared by Bureau of the Census, Industry Division, Textile Branch

For sale by the Bureau of the Census, Washington 25, D. C.
Price 10 cents - 35 cents per year

Cotton broad woven fabric production in the first quarter of 1957 was 1 percent below the previous quarter and 9 percent lower than the first quarter 1956 level.

Production of napped fabrics, blanketing and blankets was 6 percent higher than the fourth quarter 1956 level, while the output of sheeting yarn fabric and print cloth yarn fabric increased 1 percent compared to the previous quarter. Other fabric categories showed declines in production ranging from 2 percent for fine cotton fabrics to 13 percent for colored yarn fabrics.

Beginning with the first quarter 1957 report, a number of revisions have been made to the fabric reference list used to collect these data. The majority of these changes have been made to fabrics included in the category "Sheeting and Allied Coarse and Medium Yarn Fabrics." Within this category comparable data for 1956 are available only for groups of fabrics and not in the detail shown for 1957.

As usual when revisions of this type are initiated, the new figures should be regarded as tentative and subject to revisions.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

Table 1.--SUMMARY OF PRODUCTION BY CLASS OF FABRIC

(Thousands of linear yards)

Type of goods	January-March 1957 (preliminary)	October-December 1956*	January-March 1956*	Percent change January-March 1957 from--

*Separate data collected for this fabric beginning with the first quarter 1957. Comparable data for 1956 are therefore not available.

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The data are for the 13 week periods ending March 30, 1957, December 29, 1956 and March 31, 1956, all production as taken from the looms.

²Includes estimates of 30 percent or more for companies whose reports were not received in time for tabulation.

³Hose and belting duck production in pounds not included in any total or sub-total.

FOR RELEASE: October 2, 1957

SERIES: M22T.1-2-7 (formerly M15A)

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES SECOND QUARTER 1957 1947-1949 = 100

MASS. INST. TECH.
OCT 4 1957
FEELEY LIBRARY

Prepared by Bureau of the Census, Industry Division, Textile Branch

For sale by the Bureau of the Census, Washington 25, D. C.
Price 10 cents - 35 cents per year

Cotton broad woven fabric production in the second quarter of 1957 was 3 percent below the previous quarter and 7 percent lower than the second quarter 1956 level.

Production of all major fabric classes showed declines compared to the previous quarter ranging from 1 percent for print cloth yarn fabrics to 11 percent for duck and allied fabrics, and for napped fabrics. The decline compared to the second quarter of 1956 for the product classes ranged from 3 to 20 percent.

Beginning with the first quarter 1957 report, a number of revisions have been made to the fabric reference list used to collect these data. The majority of these changes have been made to fabrics included in the category "Sheeting and Allied Coarse and Medium Yarn Fabrics." Within this category comparable data for 1956 are available only for groups of fabrics and not in the detail shown for 1957.

As usual when revisions of this type are initiated, the new figures should be regarded as tentative and subject to revisions. In some cases, the first quarter 1957 data previously published has been revised in this report.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 3 percent of the total production.

*Separate data collected for this fabric beginning with the first quarter 1957. Comparable data for 1956 are therefore not available.

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The data are for the 13 week periods ending June 29, 1957, March 30, 1957 and June 30, 1956, all production as taken from the looms.

²Includes estimates of 30 percent or more for companies whose reports were not received in time for tabulation.

³Hose and belting duck production in pounds not included in any total or sub-total.

⁴Prior to 1957 separate data for ginghams and tissue ginghams, combed, part combed and fine carded, code 1874, were not collected. The production of such fabrics were included by manufacturers in codes 1860 and 1879.

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES

THIRD QUARTER 1957
1947-1949 = 100

Cotton broad woven fabric production in the third quarter of 1957 was 6 percent below the previous quarter and 5 percent lower than the third quarter 1956 level.

The only major fabric class which did not decline from both the previous quarter and the third quarter in 1956 was towels, toweling and dishcloth fabric. This fabric class increased 3 percent from the second to third quarters and 4 percent over the third quarter 1956. All other fabric classes showed declines from the previous quarter ranging from 3 percent for print cloth yarn fabrics to 15 percent for napped fabrics, blankets and blanketing. They also showed decreases from the third quarter of the previous year ranging from 2 percent for print cloth yarn fabrics to 18 percent for napped fabrics, blankets and blanketing.

Beginning with the first quarter 1957 report, a number of revisions have been made to the fabric reference list used to collect these data. The majority of these changes have been made to fabrics included in the category "Sheeting and Allied Coarse and Medium Yarn Fabrics." Within this category comparable data for 1956 are available only for groups of fabrics and not in the detail shown for 1957.

As usual when revisions of this type are initiated, the new figures should be regarded as tentative and subject to revisions. In some cases, the first and second quarter 1957 data previously published have been revised.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 3 percent of the total production.

Table 1-1-PRODUCTION AND LOOM ASSIGNMENTS BY TYPE OF FABRIC

(Preliminary)

Type of goods	Reference list number	Looms operating September 28, 1955	Production*		
			July-September 1957	April-June 1957 revised	July-September 1956 revised
			Thousands of linear yards		
COTTON BROAD WOVEN GOODS OVER 12 INCHES IN WIDTH.....		3,182	1,243,446	1,437,091	1,356,566
Duck and allied fabrics (including combed duck).....		6,355	49,714	55,911	57,111
Ounce duck.....		4,867	39,511	44,928	46,740
Army duck including shoe duck, wide army duck and pilled waxy and filling awning stripes.....		1,337	8,683	9,417	8,442
32 1/2" 3 oz. basic weight - all widths.....	1011	712	3,431	4,448	3,415
28 1/2" 10 and 12 oz. basic weight - all widths.....	1006	112	21,206	21,310	21,006
All other army duck constructions including shelter tent.....	1011	509	3,447	3,649	3,217
Flat duck (including enameling duck and single yarn awning stripes.....		3,530	3,238	3,411	37,244
Single filling.....		1,637	13,313	24,664	26,989
2" 3 oz. basic weight - all widths.....	1016	618	4,327	4,473	5,266
2" 10 and 12 oz. basic weight - all widths.....	1021	344	1,915	2,364	1,665
All other single filling flat duck constructions.....	1031	1,745	17,311	18,042	18,858
Double filling.....		833	7,415	12,447	10,793
38" 8 oz. basic weight - all widths.....	1046	286	1,745	4,174	4,300
All other double filling flat duck constructions.....	1052	547	4,730	6,068	6,553
Numbered duck (including narrow, sail, life, and margin.....		771	4,301	3,390	3,364
#75 to #48 inclusive wider than 24".....	1071	354	1,350	2,268	2,334
#40 to #12 inclusive wider than 24".....	1076	26	1,568	1,549	1,553
Paper felts.....	1081	44	91	93	101
Other numbered ducks.....	1081	101	791	1,480	768
Hose and belting ducks - thousands of linear yards.....	1081	533	4,315	4,544	4,382
Hose and belting ducks - thousands of pounds.....	1087	...	34,129	38,621	32,350
Filter cloth (including filter twills and special constructions for filtration purposes).....	1091	213	1,367	1,110	877
Sheeting and allied coarse and medium yarn fabrics.....		28,342	526,135	647,441	624,334
Osnaburgs (single yarn-clean, tinged and part waste-all widths.....		1,347	31,157	33,473	30,052
40"-42" x 48-50.5 and 38 or 40 x 24 to 26 - 3.11 yard.....	1200	187	1,416	1,773	1,794
40"-34 x 24-34.5 and 26 or 32 x 24 to 26 - 3.15 yard.....	1204	176	1,116	4,599	2,419
All other osnaburg construction.....		1,784	28,425	27,301	25,139
Under 42" wide.....	1204	1,714	18,988	20,217	18,441
42" and wider.....	1209	1,365	7,407	6,484	6,698
Sheetings.....		33,124	150,194	240,094	282,999
Soft filled sheetings for napping.....		9,901	85,556	103,614	103,067
Under 42" wide.....	1215+	9,663	82,235	101,713	
42" and wider - single yarn.....	1217+	(D)	(D)	(D)	103,067
42" and wider - pilled yarn.....	1219+	(D)	(D)	(D)	
Class A (average yarn numbers 4's to 15's inclusive.....		5,104	37,694	42,496	38,477
40"-42" x 48 and 42 x 44 - 3.14 yard.....	1210	275	6,650	8,042	9,604
30"-48 x 42 and 42 x 44 - 3.15 yard.....	1222	416	4,471	9,908	5,386
All other class "A" constructions.....		3,813	26,571	24,546	23,787
Under 48" wide.....	1223+	2,747	18,667	16,627	
48" and wider.....	1224+	1,366	7,904	7,419	22,780
Class B (average yarn numbers, 16's to 21's inclusive.....		7,076	52,495	63,472	63,442
40"-48 x 44 and 42 x 40 - 3.25 yard.....	1228	150	1,164	1,226	1,348
40"-48 x 44 and 42 x 40 - 3.25 yard.....	1230	1,460	13,777	17,118	12,713
40"-44 x 40 - 4.15 yard.....	1240	983	7,665	9,257	7,347
37"-48 x 48 and 42 x 44 - 4.30 yard.....	1241	1,004	6,638	9,538	7,591
31"-48 x 48 and 42 x 44 - 5.00 yard.....	1244	888	6,559	7,418	6,196
All other class "B" constructions.....		1,541	15,691	18,495	18,450
Under 48" wide.....	1243	1,150	10,092	13,384	
48" and wider.....	1245	1,341	5,594	5,411	18,450
Class C (average yarn numbers above 21's.....		11,103	74,449	80,712	79,413
40"-60 x 63 and 64 x 64 - 3.15 yard.....	1248	169	1,316	1,493	1,417
40"-60 x 56/60 x 52 and 56 x 60/56 - 4.60 yard.....	1250	881	4,843	5,982	6,729
40"-56 x 48 - 4.30 yard.....	1251	912	7,088	7,091	7,060
36"-60 x 56/60 x 52 and 56 x 60/56 x 56 - 4.30 yard.....	1256	311	2,774	3,426	3,221
36"-48 x 44/48 x 40 and 44 x 44/44 x 40 - 5.50 yard.....	1258	119	1,424	1,473	1,346
36"-44 x 40 and 40 x 60 - 6.05 to 6.15 yard.....	1260	141	1,799	1,316	1,474

See footnotes at end of table.

Table 2.--PRODUCTION AND LOOM ASSIGNMENTS BY TYPE OF FABRIC--Continued
(Preliminary)

Type of goods	Reference list number	Looms operating September 28, 1957	Production ¹		
			July-September 1957	April-June 1957 (revised)	July-September 1956 (revised)
Sheeting and allied coarse and medium yarn fabrics--Continued			Thousands of linear yards		
Sheetings--Continued					
Class C (Average yarn numbers above 21's)--Continued					
All other class "C" constructions.....		8,024	55,155	59,030	53,363
Under 48" wide.....	1261*	5,047	36,167	39,839	
48" and wider.....	1262*	2,977	18,988	19,191	53,363
Carded poplins.....	1264	1,202	9,170	9,648	22,079
Three leaf herringbone twills (except jeans).....	1268	(D)	(D)	21,765	21,749
Drills.....		7,283	48,780	49,066	57,392

*Separate data collected for this fabric beginning with the first quarter 1957. Comparable data for 1956 are therefore not available.

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The data are for the 13 week periods ending September 28, 1957, June 29, 1957 and September 29, 1956, all production as taken from the looms.²Includes estimates of 30 percent or more for companies whose reports were not received in time for tabulation.³Hose and belting duck production in pounds not included in any total or sub-total.⁴Prior to 1957 separate data for ginghams and tissue ginghams, combed, part combed and fine carded, code 1874, were not collected. The production of such fabrics were included by manufacturers in codes 1860 and 1879.

FOR RELEASE: March 20, 1958

SERIES: M22T.1-4-7 (formerly M15A)

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES FOURTH QUARTER 1957 1947-1949 = 100

Prepared by Bureau of the Census, Industry Division, Textiles

For sale by the Bureau of the Census, Washington 25, D. C.
Price 10 cents - 35 cents per year

Cotton broad woven fabric production in the fourth quarter of 1957 was 5 percent above the previous quarter but 8 percent lower than the fourth quarter 1956 level.

Production for all major fabric classes except napped fabrics, blankets and blanketing increased compared to the previous quarter although they were all from 2 to 26 percent below the fourth quarter 1956 level. Fine cotton fabric output was 11 percent higher than the previous quarters production while duck and allied fabric production increased 9 percent and print cloth yarn production increased 6 percent.

Beginning with the first quarter 1957 report, a number of revisions have been made to the fabric reference list used to collect these data. The majority of these changes have been made to fabrics included in the category "Sheeting and Allied Coarse and Medium Yarn Fabrics." Within this category comparable data for 1956 are available only for groups of fabrics and not in the detail shown for 1957.

As usual when revisions of this type are initiated, the new figures should be regarded as tentative and subject to revisions. In some cases, the data previously published for 1957 have been revised.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 3 percent of the total production.

*Separate data collected for this fabric beginning with the first quarter 1957. Comparable data for 1956 are therefore not available.

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The data are for the 13 week periods ending December 28, 1957, September 28, 1957 and December 29, 1956, all production as taken from the looms.

²Includes estimates of 30 percent or more for companies whose reports were not received in time for tabulation.

³Includes estimates of 25 percent or more for establishments that reported annually in 1956 with no breakdown of their quarterly production.

⁴Hose and belting duck production in pounds not included in any total or sub-total.

⁵Prior to 1957 separate data for ginghams and tissue ginghams, combed, part combed and fine carded, code 1874, were not collected. The production of such fabrics were included by manufacturers in codes 1860 and 1879.

FOR RELEASE: August 21, 1958

SERIES: M22T.1-07

COTTON BROAD WOVEN GOODS SUMMARY FOR 1957

After increases for two years, the production level of cotton broad woven goods for 1957 fell below that of any year since 1956 with the exceptions of 1949 and 1952. The 1957 production level was 8 percent below the 1956 level and 6 percent below that of 1955.

The 1957 production of print cloth and sheeting fabrics was 4 to 6 percent below the 1955-56 level and lower than that of any year since 1952.

Although the 1957 production of fine cotton fabrics was 10 percent lower than 1956 and 1 percent lower than 1955, it was higher than for any other year during the last 12 years. Towels, toweling, and wash cloth production was down 4 percent in 1957, but was higher than in any other year in the last 12 years.

The 1957 production levels for both colored yarn fabrics and napped fabrics declined rather sharply and were the lowest in over 12 years. Production of duck and allied fabrics was lower in 1957 than for any year since 1949.

During 1957 looms in place decreased by 1 percent to 351,657. They have decreased steadily from over 400,000 to 351,657 since the end of World War II.

COVERAGE--Statistics in this bulletin are based on reports received on Form M22T from manufacturers of broad woven fabrics. Quarterly reports in 1957 were filed by companies accounting for approximately 98 percent of the production of cotton broad woven fabrics. Annual reports (as required under provisions of law, 13 U.S.C. 181) were filed by almost all others. The annual data include estimates amounting to less than one percent for companies that did not report. In a few instances estimates for one or more quarters are also included for other companies.

Inquiries concerning these data should be addressed to the Bureau of the Census, Industry Division, Washington 25, D. C. This publication was prepared under the supervision of Willis K. Jordan, Chief, Foods, Apparel, and Textiles; Milton Eisen, Chief, Textiles; by S. Flory Diehl.

FACTS FOR INDUSTRY

FOR RELEASE: December 12, 1958

SERIES: M22T.1-1-8 Supplement

COTTON BROAD-WOVEN FABRICS AVERAGE WEIGHT AND WIDTH OF FABRICS

1939-FIRST QUARTER 1958

During the period from 1939 to 1958, the average width of cotton broad-woven fabrics increased 9 percent. In 1939, the average linearyard of cotton fabrics included 1.07 square yards of material. This ratio increased to 1.10 in 1947 and 1.17 during the first quarter of 1958.

The largest proportionate change was reported for fine cotton fabrics. In 1939, the average linear yard of this material included 1.07 square yards of fabric. By 1958 this ratio had increased to 1.28 square yards per linear yard.

With the increase in fabric widths, there was, as would be expected, an increase in the weight per linear yard. This is shown by the decline in the number of linear yards per pound of fabric produced. In 1939, a pound of fabric was the equivalent of 3.58 linear yards. This declined to 3.30 in 1947; 3.16 in 1954; and 3.09 in the first quarter of 1958.

The composite effect of the increases in fabric widths and weight per linear yard is measured by the number of square yards per pound of fabric produced. In 1939, 3.82 square yards of fabric weighed one pound. This was reduced to 3.64 square yards in 1954 and 3.61 in 1958. This trend to heavier fabrics was not uniform and the opposite movement occurred for some categories between 1939 and 1958 or between 1947 and one of the other years surveyed.

SURVEY AUTHORIZATION

The survey of fabric production in linear yards, square yards, and pounds for the first quarter of 1958 was conducted as part of the 1958 Census of Manufactures as authorized by Act of Congress (13 U. S. C. 193). The questionnaires were mailed in the spring of 1958 as part of a program to reduce the workload, both for manufacturers and for the Census Bureau, connected with the main part of the 1958 Census of Manufactures which will be conducted early in 1959. Data for 1939, 1947, and 1954 were also collected as part of the Censuses of Manufactures for those years.

COVERAGE OF THE 1958 SURVEY

Reports were received from manufacturers accounting for approximately 95 percent of the first quarter 1958 production of cotton fabrics. Based on these reports, ratios of production of square yards and pounds to linear yards were computed for each of the fabrics shown in Table 2. These ratios were then applied to the actual production data, in linear yards, as published in Facts for Industry Series M22T-1-2-8 "Cotton Broad-Woven Fabrics" to obtain estimates of the square yards and pounds of fabric produced. For some fabrics, the ratios were based on reports accounting for less than 75 percent of the total production of that fabric. In such cases, the ratios and the data for square yards and pounds are footnoted to indicate the coverage.

SEASONAL INFLUENCES

No analysis has been made of the effect on the 1958 data of seasonal influences which may have increased or decreased the production of specific fabrics during this period.

MAN-MADE FIBER AND WOOL FABRICS

Information regarding the relationship of linear yards to square yards and pounds of fabric production was also collected for man-made fiber and wool fabrics. These data will be published in separate reports in the near future.

Inquiries concerning this report should be addressed to the Bureau of the Census, Industry Division, Washington 25, D. C.

This publication was prepared under the supervision of Willis K. Jordan, Chief, Foods, Apparel, and Textiles Branch and Milton Eisen, Chief, Textiles.

NA Not available.

¹Laundry netting is only reported in thousands of pounds. Data are not included in any totals.

²In 1939, the following fabric groups were excluded from the category "Print cloth yarn fabrics" and included with "Other woven fabrics and specialties;" window shade cloth, gauze diaper cloth, bandage and cheese cloth, and carded poplins.

³In 1939 whip cords and bedford cords were excluded from "Colored yarn fabrics" and included with "Other woven fabrics and specialties."

⁴In 1939 scrub and wiping cloths are included with "Towels, toweling, and dishcloth fabrics." In later years the fabrics were included in "Other woven fabrics and specialties."

⁵In 1939 carded cotton-and-rayon fabrics, except suitings are included with "Other woven fabrics and specialties."

		1,000 linear yards	1,000 square yards	1,000 pounds
	COTTON BROAD WOVEN FABRICS (GRAY GOODS)--Continued			
	PRINT CLOTH YARN FABRICS (CARDED YARNS APPROXIMATELY 28's to 42's)--Continued			
	Fancy print cloths:			
1342	Gauze diaper cloth.....	13,859	15,605	3,932
1347	All other fancy print cloth including pajama checks.....	4,894	5,305	1,209
1350	Bandage cloth (total threads per square inch 99 to 72) all constructions.....	27,895	31,270	3,542
	Tobacco and cheesecloth (total threads per square inch 71 and under):			
1354	All widths 20 x 12 construction.....	109,211	117,948	5,225
1358	All widths 17/18 sley x 12/14 pick.....	19,820	21,406	879
1362	All other constructions.....	163,890	175,690	9,462
	Carded broadcloths - all widths:			
1365	109 x 58.....	27,338	30,755	8,304
1367	98/100 x 58/60.....	51,891	57,236	13,663
1369	80 x 56/60.....	13,508	15,264	3,131
1371	All other carded broadcloth constructions (including slub yarns)	34,216	37,843	8,910
1378	Carded poplins (print cloth warp yarn, including slub yarns)....	7,336	8,180	2,216
1382	Three leaf twills (print cloth yarns).....	6,429	7,130	1,515
1386	All other print cloth yarn constructions.....	2,335	3,360	907
	COLORED YARN FABRICS (AVERAGE CARDED YARNS COARSER THAN 35'S).....	123,948	130,232	64,565
	Denims, clothing (basis 28" width):			
1401	1.60 yard and 2.00 yard.....	28,025	27,100	19,667
1406	2.20 yard.....	18,274	16,118	9,543
1411	2.45 yard and 3.00 yard.....	10,703	10,061	4,905
1416	All other clothing denims.....	12,905	13,331	7,102
1422	Cottonades, suiting coverts, pin stripes, pin checks, hickory stripes, etc.....	6,203	6,805	3,456
1432	Whipcords, bedford cords, shirting coverts (twill and plain weave)	2,495	2,530	1,235
	Chambrays and colored yarn shirtings (carded yarns):			
1441	36" - 3.90 yard.....	6,892	6,906	1,901
1446	All other carded yarn chambrays and shirtings.....	6,660	7,106	2,142
1453	Ginghams (except combed, part combed and fine carded).....	5,959	7,395	1,891
1455	Seersuckers (except combed, part combed, and fine carded).....	566	584	157
	All other carded suiting woven with colored yarns:			
1461	All cotton.....	(D)	(D)	(D)
1467	Cotton and rayon and/or acetate, and cotton and wool mixtures (51% or more cotton).....	(D)	(D)	(D)
1472	Bed tickings, woven, all constructions.....	18,975	25,389	9,982
	TOWELS, TOWELING, AND DISCLOTHS.....	131,290	77,885	45,276
1510	Turkish and terry woven, (including washcloths and bathmats)....	77,552	53,046	35,283
1530	Huck, damask, and jacquard woven (other than terry).....	15,386	6,277	2,781
1551	Dishtowels, dishcloths, and other twill and plain woven towels (including all cotton and chiefly cotton).....	38,352	18,562	7,212
	NAPPED FABRICS, INCLUDING BLANKETING.....	52,620	61,719	21,716
1602	Crib blanketing, all cotton and chiefly cotton.....	3,633	4,538	1,932
	Blanketing, other than crib:			
1608	100% cotton.....	6,009	11,826	3,749
	Chiefly cotton:			
1613	25-49.9% wool.....	(D)	(D)	(D)
1614	Less than 25% wool (including no wool).....	(D)	(D)	(D)
1652	Outing flannels.....	24,239	24,263	5,762
1660	Work shirt flannels.....	(D)	(D)	(D)
1666	Canton flannels.....	11,188	11,043	6,562
1672	Interlining flannel.....	(D)	(D)	(D)
1689	All other napped fabrics (except blankets).....	4,452	5,610	2,086
	FINE COTTON FABRICS (COMBED, PART COMBED, AND FINE CARDED; AVERAGE CARDED YARN FINER THAN 35'S).....	376,265	482,565	116,648
	Broadcloths (combed and part combed):			
1802	40" 136-60.....	18,828	20,899	5,223
1808	All other combed and part combed broadcloth.....	46,892	57,724	14,545

1874	Ginghams and tissue ginghams, combed, part combed, and fine carded.....	46,253	57,076	12,230
1876	Seersuckers, combed, part combed, and fine carded.....	2,382	2,611	674
1875	Colored yarn shirtings and dress goods, not elsewhere classified (combed, part combed, and fine carded) ⁷	30,849	36,402	7,778
	Cotton mixtures, chiefly cotton:			
1877	Carded cotton and rayon and/or acetate fabrics, except suitings	1,233	1,573	623
1878	Combed cotton and rayon and/or acetate fabrics, except suitings	6,679	8,723	1,875
1879	All other combed, part combed, and fine carded fabrics (average carded yarns finer than 35's).....	56,536	70,444	17,111
	OTHER WOVEN COTTON FABRICS AND SPECIALTIES.....	120,281	159,790	67,325
	Bedsread fabrics - woven style - all cotton or cotton warp:			
1702	Bedsreads, jacquard woven.....	3,142	7,478	3,464
1706	Bedsreads, not jacquard woven.....	4,061	² 9,044	² 3,931
	Drapery, upholstery, and tapestry fabrics (all cotton and chiefly cotton):			
1711	Jacquard-woven (including combed).....	² 7,312	² 10,507	² 6,320
	Other than jacquard woven (including combed):			
1715	Colored yarn fabrics.....	5,047	7,096	4,051
1729	Without colored yarn.....	31,961	40,207	16,373
	Corduroys:			
1741	Women's wear weights.....	24,512	28,851	13,264
1748	Men's wear weights 36" 12 to 13 ounce.....	2,708	3,009	2,025
1752	All other men's wear corduroys.....	2,729	3,269	1,731
1753	Velveteens.....	(D)	(D)	(D)
	Velvets, plushes, and other pile fabrics (including combed):			
1757	All cotton.....	(D)	(D)	(D)
1759	Cotton mixtures (51% or more cotton).....	² 4,718	² 6,652	² 2,507
1764	Table damask, cloths, covers, and napkins.....	4,476	4,704	2,138
1768	Industrial wiping fabrics and cloths.....	² 9,640	² 7,413	² 2,595
1770	Elastic fabrics.....	² 1,340	² 1,832	² 1,267
1772	Cotton and wool mixtures containing 25% up to 50% reprocessed wool or reused wool, not included above.....	387	707	300
1773	All other carded cotton fabrics over 12" wide.....	16,740	27,320	6,397
1096	Laundry netting.....	(¹)	(¹)	516

D Withheld to avoid disclosing figures for individual companies.

¹Laundry netting is only reported in thousands of pounds. Data are not included in any totals.

²Includes estimates of 25 percent or more for companies whose reports were not received in time for tabulation.

³Three leaf herringbone twills (except jeans) are combined with all other sheeting yarn fabrics.

⁴Prior to 1958 separate data were not collected for print cloths wider than 39". Such information was included in the category "All other constructions - 36" and under." Closely related subcount of 39" - 80 x 80 - 4.00 yard were frequently reported with the basic construction and not in the "All other constructions" category.

⁵Does not include fine carded marguissettes.⁶Prior to 1957 separate data were not collected for combed, part combed, and fine carded gingham and tissue gingham. The production of such fabrics were included by manufacturers in codes 1875 and 1879.⁷Prior to 1958 the definition for this item read "shirtings, Jacquard, gray-dobby and colored yarn (combed, part combed, and fine carded) not included elsewhere."

FACTS FOR INDUSTRY

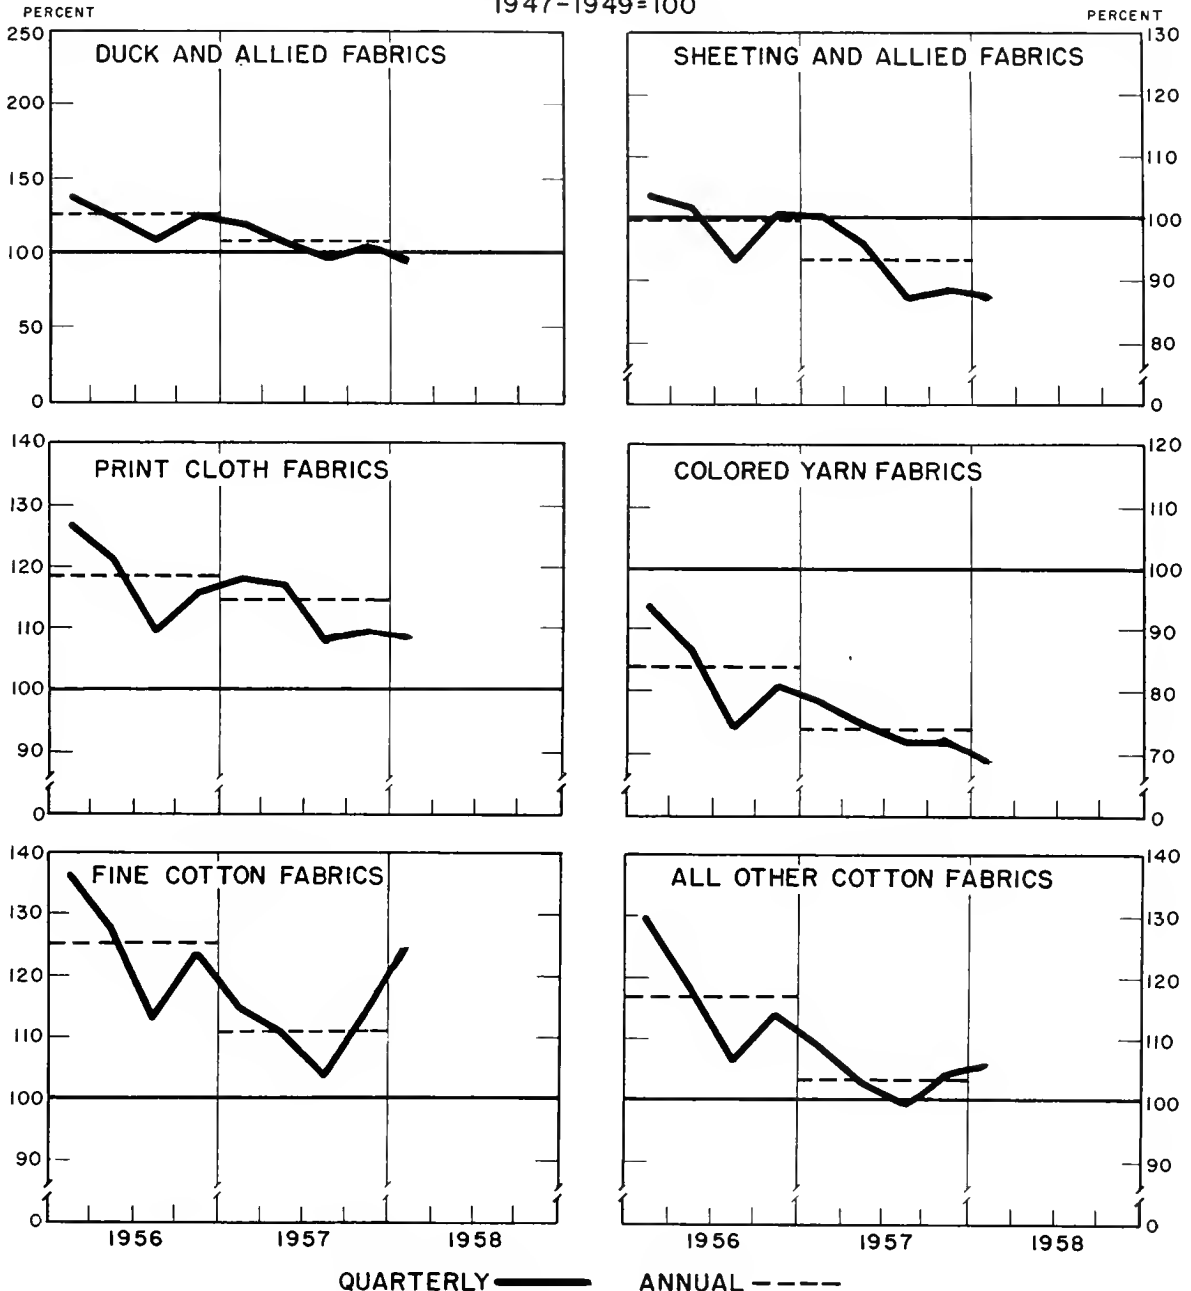

FOR RELEASE: July 2, 1958

SERIES: M22T.1-1-8

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES
FIRST QUARTER 1958

1947-1949=100

Cotton broad woven fabric production in the first quarter of 1958 was 1 percent above the previous quarter but 7 percent lower than the first quarter 1957 level.

Production of napped fabrics, blankets and blanketing increased 25 percent over the previous quarter while fine cotton fabrics increased 9 percent, and sheeting and allied coarse and medium yarn fabrics remained practically unchanged. Production for all other major fabric classes decreased from 1 to 5 percent below the previous quarter.

Except for fine cotton fabrics, production for all major fabric classes during the first quarter 1958 was from 5 to 17 percent below that of the same quarter a year earlier. Fine cotton fabric production was 7 percent above the first quarter 1957 level.

Beginning with the first quarter 1958 report, some revisions have been made to the fabric reference list used to collect these data. The majority of these changes have been made to fabrics included in the category "Print Cloth Yarn Fabrics." Within this category comparable data for 1957 are available only for groups of fabrics and not in the detail shown for 1958.

As usual when revisions of this type are initiated, the new figures should be regarded as tentative and subject to revisions. In some cases, the data previously published for 1957 have been revised.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

*Separate data collected for this fabric beginning with the first quarter 1958.

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The data are for the 13 week periods ending March 29, 1958, December 28, 1957 and March 30, 1957, all production as taken from the looms.²Includes estimates of 30 percent or more for companies whose reports were not received in time for tabulation.³Hose and belting duck production in pounds not included in any total or sub-total.⁴In 1957 and prior years, separate data were not collected for print cloths wider than 39". Such information was included in the category "all other constructions - 36" and wider." Closely related subcounts of 39" - 80 x 80 - 4.00 yard were frequently reported with the basic construction and not in the "all other construction category."⁵The definition for this item in 1957 read "shirtings, Jacquard, gray-dobby and colored yarn (combed, part combed, and fine carded) not included elsewhere."

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES
SECOND QUARTER 1958
1947-1949=100

Prepared by Bureau of the Census, Industry Division, Textiles

For sale by the Bureau of the Census, Washington 25, D. C.
Price 10 cents - 35 cents per year

Cotton broad woven fabric production in the second quarter of 1958 was 6 percent below the previous quarter and 10 percent lower than the second quarter 1957 level.

Production of duck and allied fabrics decreased 11 percent from the previous quarter level while towels, toweling and dishcloths showed a 1 percent increase. The other major fabric classes showed decreases ranging from 3 to 7 percent.

Other woven cotton fabrics showed an increase of 6 percent from the 1957 second quarter level and fine cotton fabrics, and towels, toweling and dishcloths showed increases of 4 percent and 2 percent respectively. Production for the remaining fabric classes decreased 12 to 16 percent from the 1957 second quarter level.

Beginning with the first quarter 1958 report, some revisions have been made to the fabric reference list used to collect these data. The majority of these changes have been made to fabrics included in the category "Print Cloth Yarn Fabrics." Within this category comparable data for 1957 are available only for groups of fabrics and not in the detail shown for 1958.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

Table 2.--PRODUCTION AND LOOM ASSIGNMENTS BY TYPE OF FABRIC--Continued

(Preliminary)

Type of goods	Reference list number	Looms operating June 28, 1958	Production ¹		
			April-June 1958	January-March 1958	April-June 1957 ⁷
Sheeting and allied coarse and medium yarn fabrics-- Continued			Thousands of linear yards		
Sheetings--Continued					
Class C (average yarn numbers above 21's).....		10,226	71,846	77,248	79,160
40"-64 x 68 and 64 x 64 - 3.15 yard.....	1248	406	2,429	2,849	2,293
40"-60 x 56/60 x 52 and 56 x 60/56 - 3.60 yard.....	1250	709	4,761	4,847	6,241
40"-56 x 48 - 4.30 yard.....	1252	726	5,490	5,293	7,092
36"-60 x 56/60 x 52 and 56 x 60/56 x 56 - 4.00 yard.	1256	121	726	1,014	2,618
36"-48 x 44/48 x 40 and 44 x 44/44 x 40 - 5.50 yard.	1258	40	466	815	1,017
36"-44 x 40 and 40 x 40 - 6.05 to 6.15 yard.....	1260	138	1,317	1,100	2,338
All other class "C" constructions.....		8,086	56,657	61,330	57,561
Under 48" wide.....	1261	5,350	38,043	39,724	39,912
48" and wider, excluding bed sheeting.....	1263	2,736	18,614	21,606	17,649
Carded poplins.....	1264	1,386	10,079	13,770	9,705
Three leaf herringbone twills (except jeans).....	1268	(D)	(D)	(D)	(D)
Drills.....		6,485	45,283	50,139	49,278
30" - 2.50 - all counts.....	1901	217	1,099	1,140	1,723
All other drills, 36" and narrower.....	1903	711	6,068	6,143	6,986
Drills over 36" but under 48".....		4,336	31,064	35,307	30,321
39" - 1.90-2.00 and pro-rata widths.....	1905	1,469	9,999	14,027	13,552
All other drills, over 36" but under 48".....	1907	2,867	21,065	21,280	16,769
Drills 48" and wider.....		1,221	7,052	7,549	10,248
59" - 1.85-2.25 and pro-rata widths.....	1909	869	4,461	5,319	7,266
All other drills over 48" wide.....	1911	352	2,591	2,230	2,982
Jeans (plain and herringbone).....		1,800	9,406	11,695	12,540
Under 36" wide.....	1915	(D)	(D)	(D)	(D)
38/39" - 96 x 64 - 2.85 and pro-rata widths to 40".....	1917	(D)	(D)	(D)	(D)
All other Jeans, 36" and wider.....	1919	1,208	5,851	6,882	7,450
Three leaf pocketing twills and silesias (sheeting yarns).		2,158	11,239	10,397	17,117
Under 40" wide.....	1921	1,333	7,403	6,952	13,778
40" and wider.....	1923	825	3,836	3,445	3,339
Four leaf twill fabrics.....		9,320	67,039	72,635	78,313
95/120 sley x 48/60 pick - under 48".....		5,287	38,427	43,158	40,135
44" 1.30-1.49 and pro-rata widths.....	1931	2,344	17,074	19,878	18,417
44" 1.50-1.89 and pro-rata widths.....	1933	1,523	12,707	15,243	13,525
44" 1.90-and lighter.....	1935	1,420	8,646	8,037	8,193
86/90 sley x 40x44 pick - under 48".....		835	5,270	4,539	7,154
37" 1.90 and heavier and pro-rata widths.....	1937	(D)	(D)	(D)	(D)
37" 1.91 - 2.25 and pro-rata widths.....	1941	416	3,075	2,812	3,992
37" 2.26 - 2.60 and pro-rata widths.....	1943	(D)	669	430	1,665
37" 2.61 and lighter and pro-rata widths.....	1945	(D)	(D)	(D)	(D)
Four leaf herringbone twills.....	1947	858	5,650	5,985	8,960
All other four leaf twills.....		2,340	17,692	18,953	22,064
Under 48" wide.....	1949	1,836	15,062	14,139	19,507
48" and wider.....	1951	504	32,630	34,814	2,557
Sateens (sheeting yarns).....		7,944	42,124	45,959	39,320
Under 48" wide.....	1953	7,082	37,524	41,581	33,699
48" and wider.....	1955	862	4,600	4,378	5,621
Gabardines and cavalry twills (carded).....	² 1287	435	1,615	1,366	3,294
Birdseye diaper cloth.....	1288	2,476	17,027	18,070	20,967
Bed sheetings (42" and wider) muslin and carded percales..		14,674	70,241	69,327	76,732
Sley of more than 64 including carded percales.....	1291	3,100	15,502	16,268	18,901
64 sley.....	1294	9,966	44,786	44,385	50,033
Sley of less than 64.....	1296	1,608	9,953	8,674	7,798
Pillow and industrial tubing.....	1298	(D)	(D)	(D)	(D)
All other sheeting yarn fabrics.....	1299	1,232	4,741	*6,355	7,583

See footnotes at end of table.

Table 2.--PRODUCTION AND LOOM ASSIGNMENTS BY TYPE OF FABRIC--Continued

(Preliminary)

Type of goods	Reference list number	Looms operating June 28, 1958	Production ¹		
			April-June 1958	January-March 1958	April-June 1957 ⁷
			Thousands of linear yards		
Print cloth yarn fabrics (carded yarns approximately 28's to 42's).....		96,609	829,134	*893,242	969,956
Window shade cloth.....	1302	3,061	21,750	*21,888	22,841
Plain print cloths (total threads per square inch 180 to 100).....		63,753	393,455	*388,732	401,866
45" - 64 x 56 - 4.75 yard.....	² 1304	1,309	11,290	11,244	(⁵)
45" - 60 x 48 - 5.35 yard.....	² 1305	1,347	15,128	14,119	(⁵)
39" - 80 x 80 - 4.00 yard.....	² 1307	15,630	80,354	75,113	154,943
Closely related subcounts of 39" - 80 x 80 - 4.00 yard..	1308	8,743	54,663	52,642	(⁵)
39" 68 x 72 - 4.75 yard.....	1310	4,205	25,990	26,865	29,094

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The data are for the 13 week periods ending June 28, 1958, March 29, 1958 and June 29, 1957, all production as taken from the looms.

²Separate data collected for this fabric beginning with the first quarter 1958.

³Includes estimates of 25 percent or more for companies whose reports were not received in time for tabulation.

⁴Hose and belting duck production in pounds not included in any total or sub-total.

⁵In 1957 and prior years, separate data were not collected for print cloths wider than 39". Such information was included in the category "all other constructions - 36" and wider." Closely related subcounts of 39" - 80 x 80 - 4.00 yard were frequently reported with the basic construction and not in the "all other construction category."

⁶The definition for this item in 1957 read "shirtings, Jacquard, gray-dobby and colored yarn (combed, part combed, and fine carded) not included elsewhere."

⁷Second quarter 1957 figures are from annual summary, Series: M22T.1-07 released August 21, 1958.

JAN 2 1959

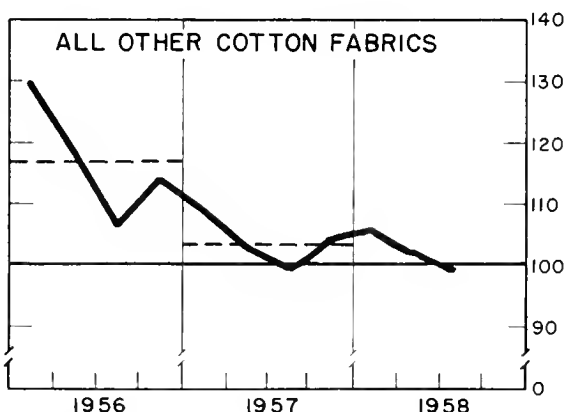

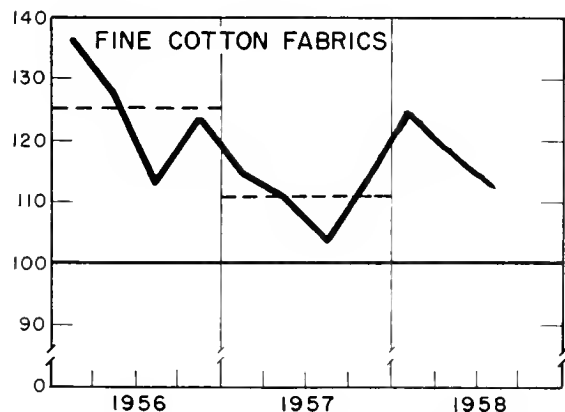

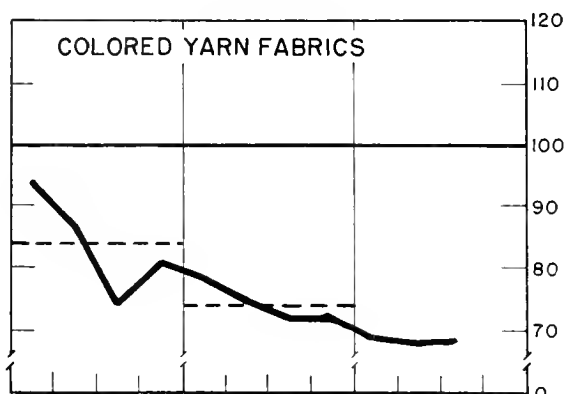

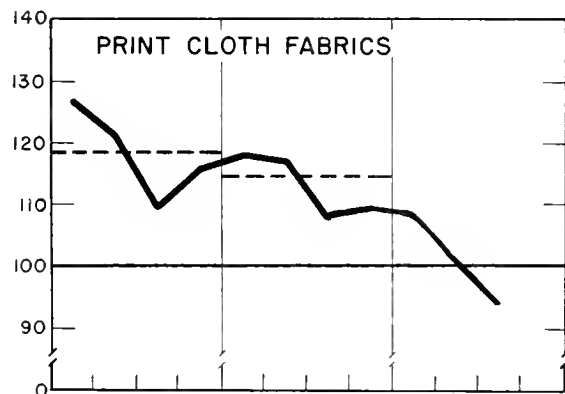

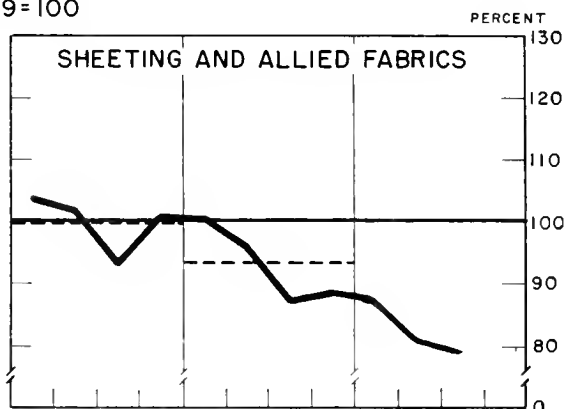

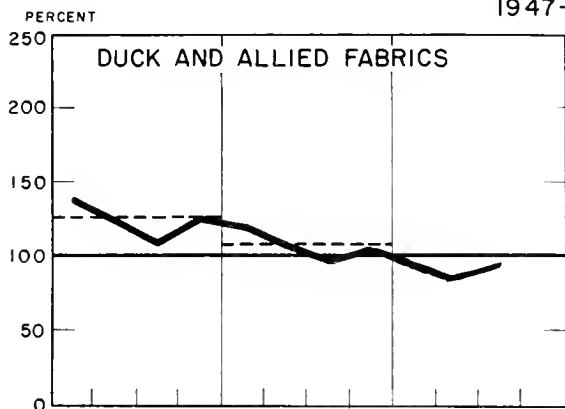

FACTS FOR INDUSTRY

FOR RELEASE: December 29, 1958

SERIES: M22T.1-3-8

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES
THIRD QUARTER 1958
1947-1949=100

QUARTERLY ——— ANNUAL - - - -

Cotton broad woven fabric production in the third quarter of 1958 was 4 percent below the previous quarter and 6 percent lower than the third quarter 1957 level.

Production of duck and allied fabrics increased 4 percent from the previous quarter level. The other major fabric classes showed decrease ranging from 1 to 9 percent.

Fine cotton fabrics and other woven cotton fabrics and specialties showed increases of 8 and 6 percent, respectively, from the 1957 third quarter level. Production for the remaining fabric classes decreased 1 to 12 percent from the 1957 third quarter level.

Beginning with the first quarter 1958 report, some revisions have been made to the fabric reference list used to collect these data. The majority of these changes have been made to fabrics included in the category "Print Cloth Yarn Fabrics." Within this category comparable data for 1957 are available only for groups of fabrics and not in the detail shown for 1958.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

*Revised.

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The data are for the 13 week periods ending September 27, 1958, June 28, 1958 and September 28, 1957, all production as taken from the looms.

²Separate data collected for this fabric beginning with the first quarter 1958.

³Includes estimates of 25 percent or more for companies whose reports were not received in time for tabulation.

⁴Hose and belting duck production in pounds not included in any total or sub-total.

⁵In 1957 and prior years, separate data were not collected for print cloths wider than 39". Such information was included in the category "all other constructions - 36" and wider." Closely related subcounts of 39" - 80 x 80 - 4.00 yard were frequently reported with the basic construction and not in the "all other construction category."

⁶The definition for this item in 1957 read "shirtings, Jacquard, gray-dobby and colored yarn (combed, part combed, and fine carded) not included elsewhere."

⁷Third quarter 1957 figures are from annual summary, Series: M22T.1-07 released August 21, 1958.

FACTS FOR INDUSTRY

FOR RELEASE: April 6, 1959

SERIES: M22T.1-4-8

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES
FOURTH QUARTER 1958
1947-1949=100

Cotton broad woven fabric production in the fourth quarter of 1958 was 11 percent above the previous quarter and approximately the same as the fourth quarter 1957 level.

Production of the major fabric classes showed increases ranging from 7 to 22 percent above the previous quarter.

Print cloth yarn fabrics and colored yarn fabrics showed decreases of 8 and 2 percent, respectively, from the 1957 fourth quarter level. Production for the remaining fabric classes increased 2 to 17 percent from the 1957 fourth quarter level.

Beginning with the first quarter 1958 report, some revisions have been made to the fabric reference list used to collect these data. The majority of these changes have been made to fabrics included in the category "Print Cloth Yarn Fabrics." Within this category comparable data for 1957 are available only for groups of fabrics and not in the detail shown for 1958.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The data are for the 14 week period ending January 3, 1959 and for the 13 week periods ending September 27, 1958, and December 28, 1957-all production as taken from the looms.

²Separate data collected for this fabric beginning with the first quarter 1958.

³Includes estimates of 25 percent or more for companies whose reports were not received in time for tabulation.

⁴Hose and belting duck production in pounds not included in any total or sub-total.

⁵In 1957 and prior years, separate data were not collected for print cloths wider than 39". Such information was included in the category "all other constructions - 36" and wider." Closely related subcounts of 39" - 80 x 80 - 4.00 yard were frequently reported with the basic construction and not in the "all other construction category."

⁶The definition for this item in 1957 read "shirtings, Jacquard, gray-dobby and colored yarn (combed, part combed, and fine carded) not included elsewhere."

⁷Fourth quarter 1957 figures are from annual summary, Series: M22T.1-07 released August 21, 1958.

COTTON BROAD WOVEN GOODS
SUMMARY FOR 1958

Production of cotton broad woven goods in 1958 amounted to 8,973 million linear yards. This represents a decline of 6 percent from the 1957 level and 13 percent from the 1956 level.

Production during the first three quarters of 1958 was below the comparable periods of 1957. During the fourth quarter, production increased more than 200 million linear yards and was slightly higher than the fourth quarter 1957 level.

The production of fine cotton fabrics in 1958 was 7 percent above the 1957 level, while the output of "other woven cotton fabrics and specialties" was 5 percent above 1957. The production of the other major fabric classes was lower than the 1957 production and the production for each of the major fabric classes was lower than the 1956 level.

COVERAGE--Statistics in this publication are based on reports received on Form M22T from manufacturers of broad woven fabrics. Quarterly reports in 1957 were filed by companies accounting for approximately 98 percent of the production of cotton broad woven fabrics. Annual reports (as required under provisions of law, 13 U.S.C. 181) were filed by almost all others. The annual data include estimates amounting to less than one percent for companies that did not report. In a few instances estimates for one or more quarters are also included for other companies.

Inquiries concerning these data should be addressed to the Bureau of the Census, Industry Division, Washington 25, D. C. This publication was prepared under the supervision of Willis K. Jordan, Chief, Foods, Apparel, and Textiles; Milton Eisen, Chief, Textiles; by S. Flory Diehl.

¹Revised annual and quarterly data.

²Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

³Quarterly data are for 13-week periods approximating the calendar quarter, except that the fourth quarter 1958 included 14 weeks.

⁴Quarterly data include estimates of 25 percent or more for establishments reporting annually with no breakdown of their quarterly production.

⁵Production in pounds not included in any total or subtotal.

⁶Sheeting yarn fabrics, 56 square and finer.

⁷In 1957, separate data were not collected for print cloths wider than 39". Such information was included in the category of "all other constructions - 36" and wider." Closely related subtotals of 39" - 80 x 80 - 4.00 yard were frequently reported with the basic construction and not in the "all other construction category."

⁸The definitions for individual items were changed in 1958. The descriptions used in 1957 were:

Reference List Number 1287 - Gabardines (carded)

Reference List Number 1835 - Oxfords - combed and fine carded (carded average yarn finer than 35's)

Reference List Number 1875 - Shirtings, Jacquard, gray-dobby, and colored yarn (combed, part combed, and fine carded, not included above)

SERIES: M22T.1-1-9

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES

FIRST QUARTER 1959

1947-1949=100

Cotton broad woven fabric production in the first quarter of 1959 was 3 percent above the previous quarter and 2 percent above the first quarter 1958 level.

Production of the major fabric classes varied from 4 percent lower to 11 percent above the previous quarters output.

Output of napped cotton fabrics was 11 percent above the previous quarters level and approximately the same as the production in the first quarter of 1958. Production of sheeting yarn fabrics showed increases of 5 and 6 percent compared to the previous quarter and the comparable period of last year.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production data shown in Tables 1 and 2 represents total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in Tables 3, 4, and 5 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Facts for Industry relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption data.

FACTS FOR INDUSTRY

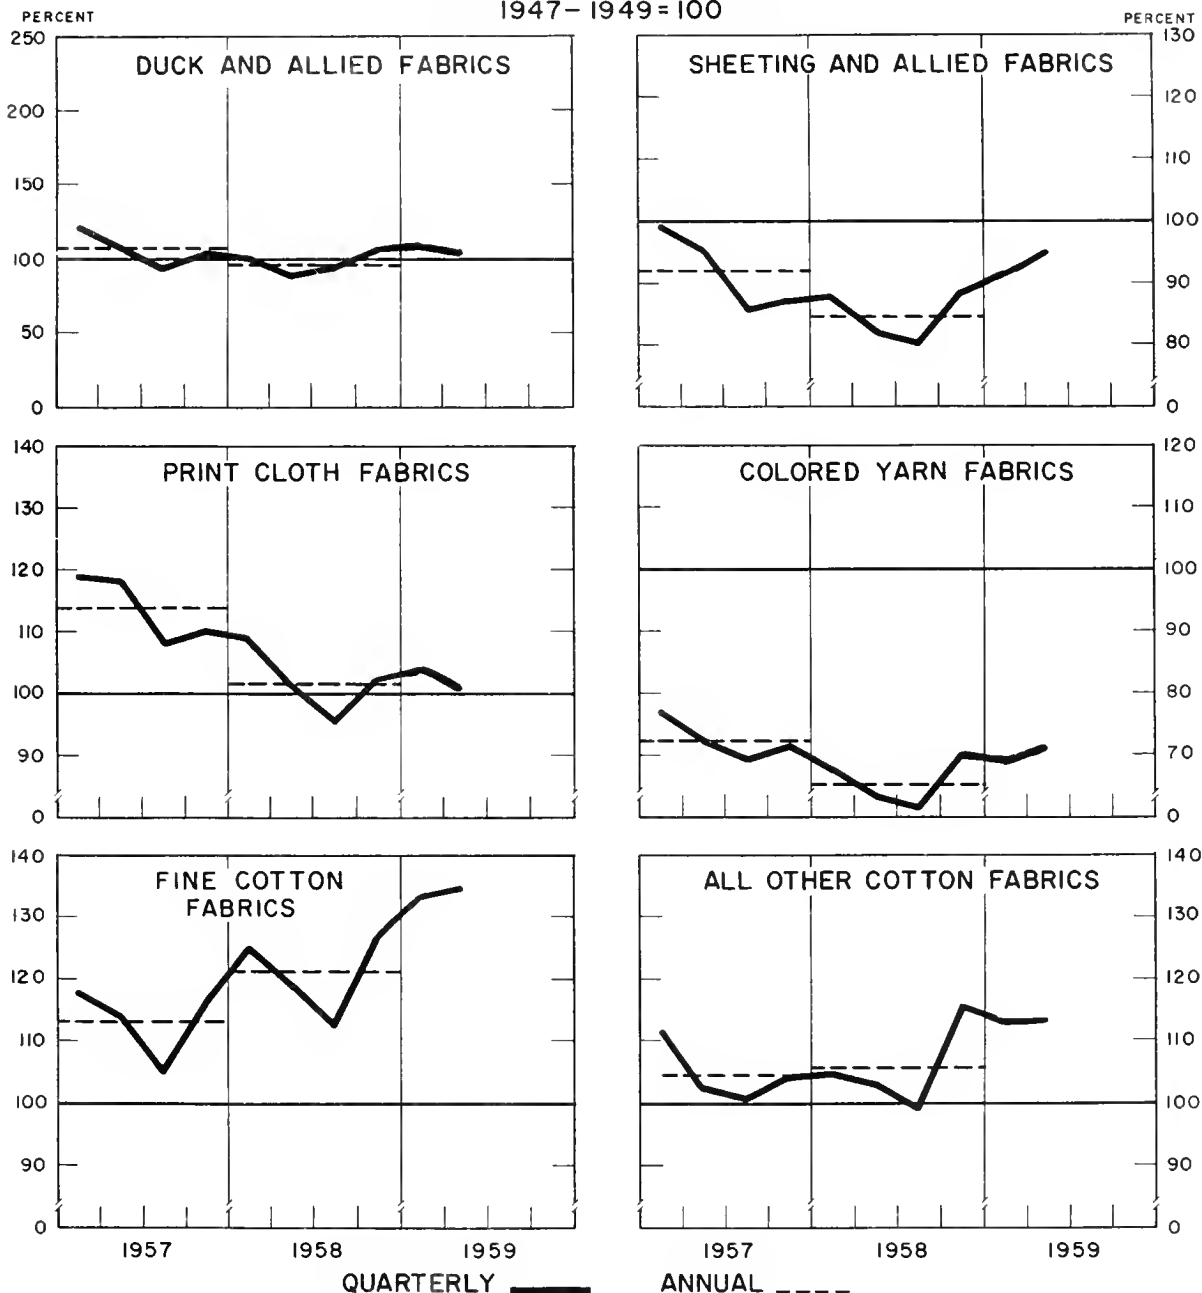

OCT 7 1959

FOR RELEASE: October 2, 1959

SERIES: M22T.1-2-9

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES
SECOND QUARTER 1959
1947-1949=100

Cotton broad woven fabric production in the second quarter of 1959 was approximately the same as in the previous quarter but 9 percent above the second quarter 1958 level.

Production of the major fabric classes varied from 4 percent lower to 7 percent above the previous quarters output.

Output of colored yarn fabrics was 7 percent above the previous quarters level and 15 percent above the production in the second quarter of 1958. Production of sheeting yarn fabrics showed increases of 2 and 16 percent compared to the previous quarter and the comparable period of last year.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production data shown in Tables 1 and 2 represents total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in Tables 3, 4, and 5 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Facts for Industry relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woollen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption data.

FACTS FOR INDUSTRY

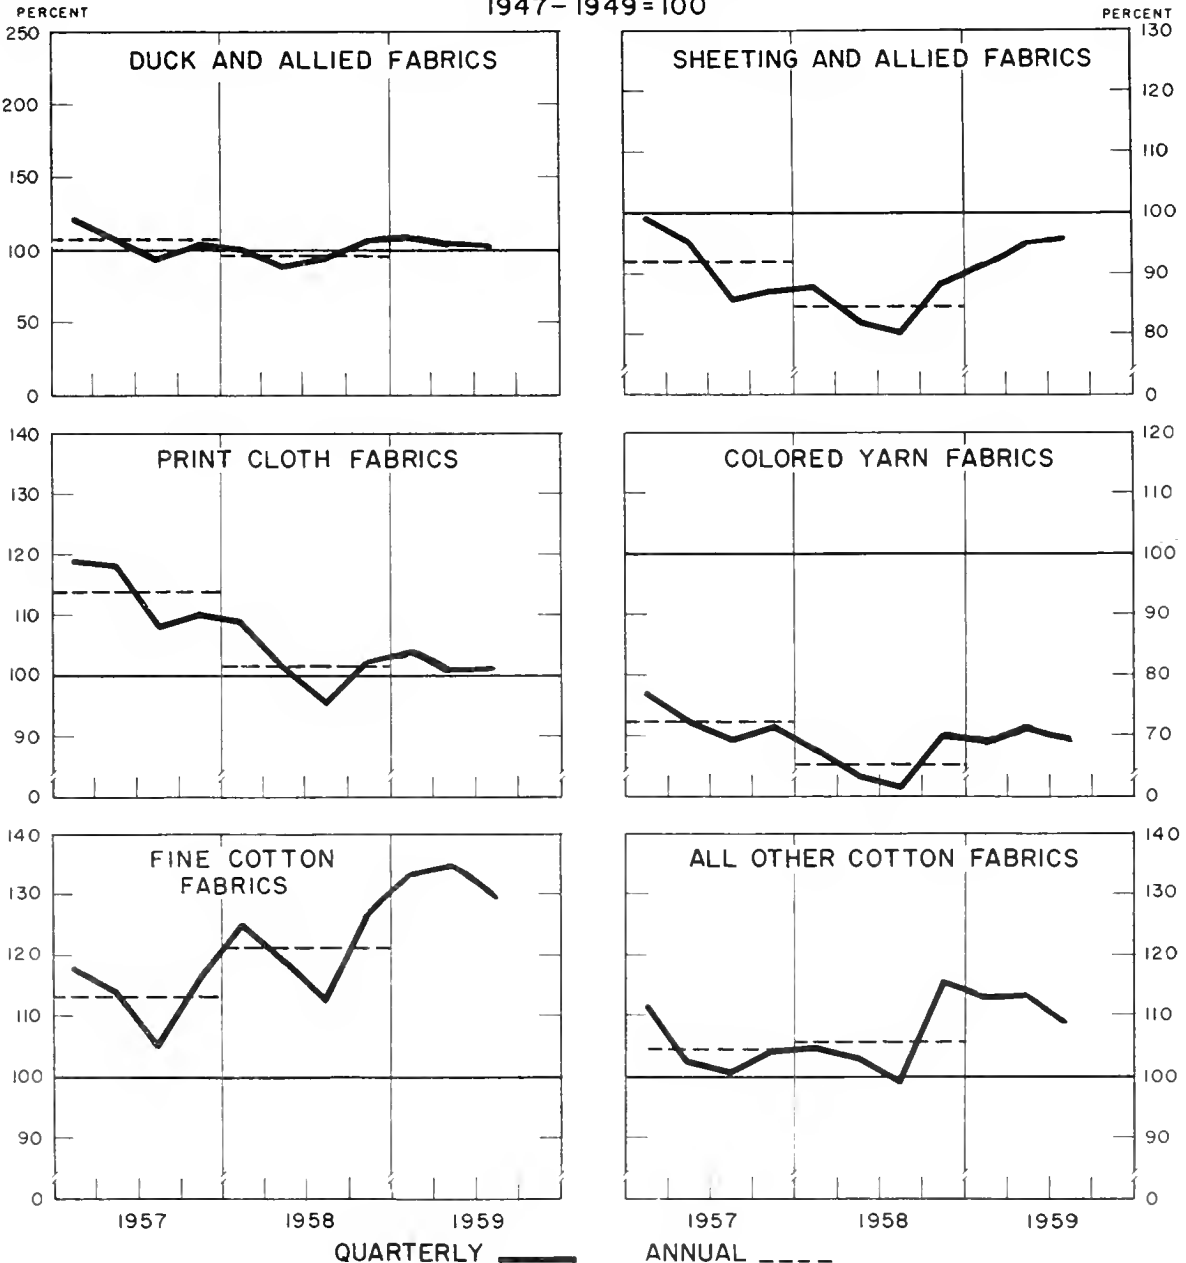

JAN 5

FOR RELEASE: December 28, 1959

SERIES: M22T.1-3-9

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES
THIRD QUARTER 1959
1947-1949=100

Prepared by the Bureau of the Census, Industry Division, Textiles

For sale by the Bureau of the Census, Washington 25, D. C.
Price 10 cents - 35 cents per year

2 Cotton broad woven fabric production in the third quarter of 1959 was approximately 1 percent below the previous quarter but 13 percent above the third quarter 1958 level.

Production of sheeting and allied coarse and medium yarn fabrics was 1 percent above the previous quarters level. Print cloth yarn fabric output was approximately at the previous quarters level, while the production of all other fabric classes declined 1 to 5 percent from the previous quarter. However, all fabric classes showed increases of 7 to 21 percent compared to the third quarter 1958.

COVERAGE--The data included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production data shown in Tables 1 and 2 represents total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in Tables 3, 4, and 5 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Facts for Industry relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woollen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption data.

CURRENT INDUSTRIAL REPORTS

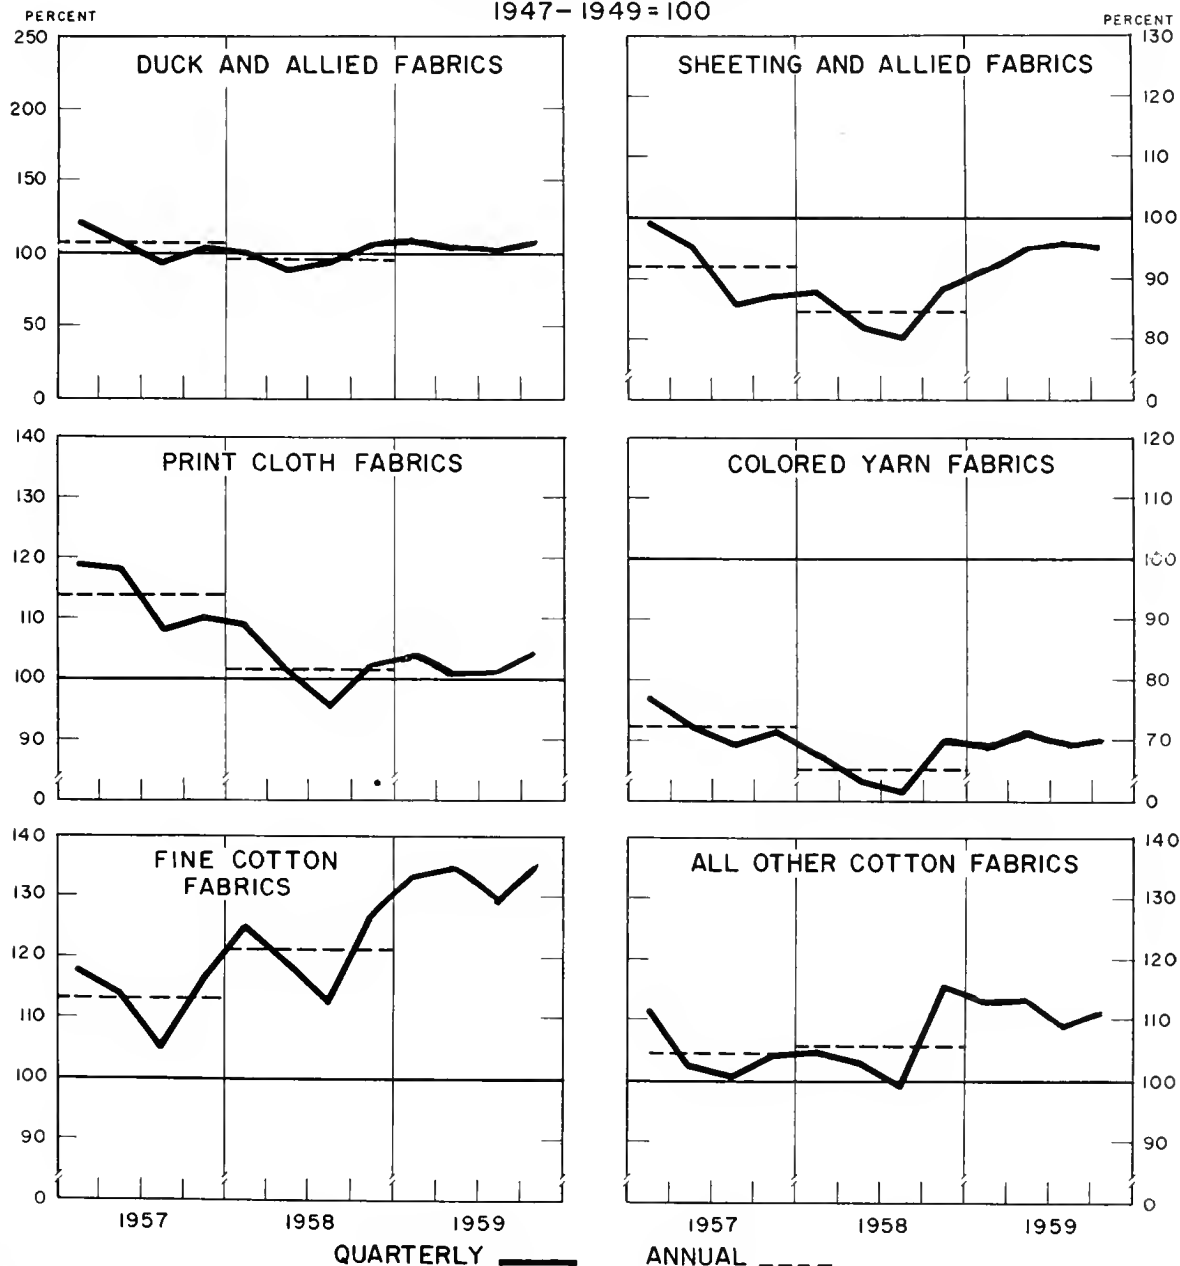

AP-7

FOR RELEASE: April 5, 1960

SERIES: M22T.1-4-9

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES
FOURTH QUARTER 1959
1947-1949=100

Prepared by the Bureau of the Census, Industry Division, Textiles

For sale by the Bureau of the Census, Washington 25, D. C.
Price 10 cents - 35 cents per year

NOTE: Effective immediately, reports previously published under the general title of "Facts for Industry" will carry the designation "Current Industrial Reports."

Cotton broad woven fabric production in the fourth quarter of 1959 was approximately 3 percent above the previous quarter and 4 percent above the fourth quarter 1958 level.

Production of sheeting and allied coarse and medium yarn fabrics was 1 percent below the previous quarters level. Print cloth yarn fabric output was approximately 4 percent above previous quarters level, while the production of all other fabric classes showed changes of -3 to +8 percent compared to the previous quarter.

COVERAGE--The figures included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1 and 2 represents total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 3, 4, and 5 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woollen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

CURRENT INDUSTRIAL REPORTS

FOR RELEASE: September 16, 1960

SERIES: M22T.1-09

COTTON BROAD WOVEN GOODS SUMMARY FOR 1959

Production of cotton broad woven goods in 1959 amounted to 9,599 million linear yards. This represents an increase of 7 percent from the 1958 level and almost 1 percent from the 1957 level.

Production of each of the major fabric classes exceeded the 1958 output. Sheeting yarn fabrics and cloth output increased 12 percent, fine cotton goods production increased 11 percent while the production of the other classes of fabric were 1 to 8 percent above the comparable 1958 levels. However, the 1958 output for print cloth fabric, colored yarn fabric and napped fabric were all below the 1957 levels.

COVERAGE--Statistics in this publication are based on reports received on Form M22T from manufacturers

of broad woven fabrics. Quarterly reports in 1959 were filed by companies accounting for approximately 98 percent of the production of cotton broad woven fabrics. Annual reports (as required under provisions of law, 13 U.S.C. 181) were filed by almost all others. The annual data include estimates amounting to less than one percent for companies that did not report. In a few instances estimates for one or more quarters are also included for other companies.

Inquiries concerning these data should be addressed to the Bureau of the Census, Industry Division, Washington 25, D. C. This publication was prepared under the supervision of Willis K. Jordan, Chief, Foods, apparel, and Textiles and Milton Eisen, Chief, Textiles.

CURRENT INDUSTRIAL REPORTS

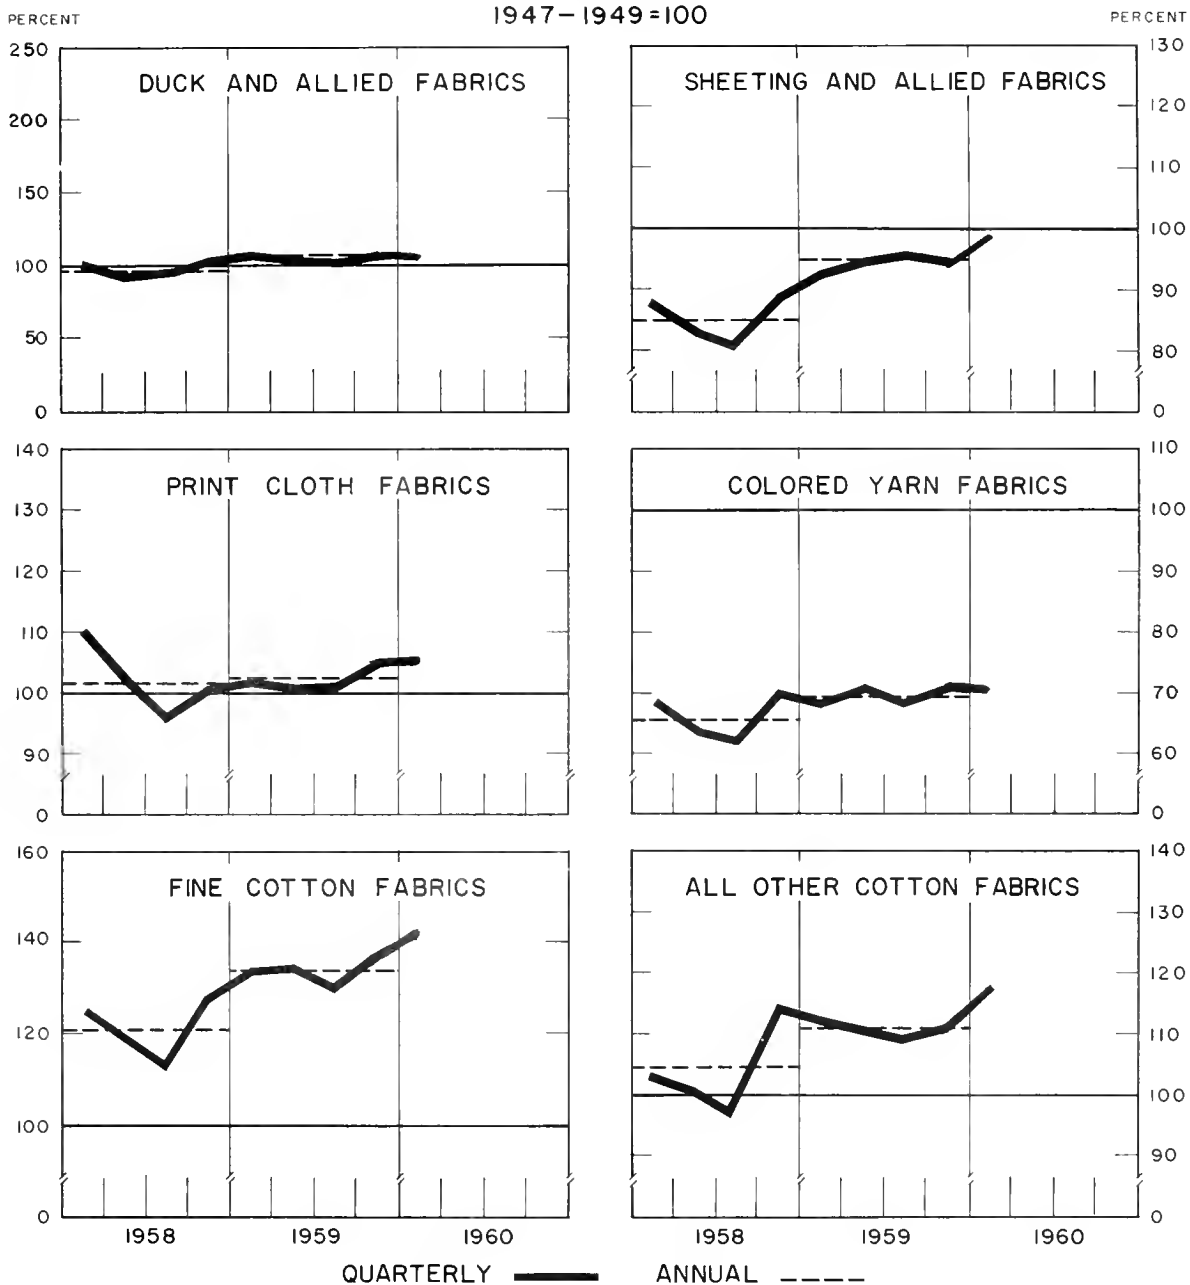

JUL 25 1960

DEWEY LIBRARY

FOR RELEASE: July 20, 1960

SERIES: M22T.1(60)-1

COTTON BROAD WOVEN GOODS QUARTERLY PRODUCTION IN THE UNITED STATES FIRST QUARTER 1960

Cotton broad woven fabric production in the first quarter of 1960 was approximately 2 percent above the previous quarter and 4 percent above the first quarter 1959 level.

Production of sheeting and allied coarse and medium yarn fabrics was 5 percent above the previous quarters level. Napped fabric output was approximately 20 percent above the previous quarters level, while the production of all other fabric classes showed changes of -5 to +5 percent compared to the previous quarter.

Production of cotton fabrics in the Southern States amounted to 2,289 million linear yards. This was 2 percent above the fourth quarter output. The New England production was unchanged from the previous quarter. Data showing production by Geographic Division and Selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1 and 2 represents total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 3, 4, and 5 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

Table 2.--PRODUCTION AND LOOM ASSIGNMENTS BY TYPE OF FABRIC

3

(Preliminary)

Type of goods	Reference list number	Looms operating April 2, 1960	Production ¹		
			January-March 1960	October-December 1959	January-March 1959
			Thousands of linear yards		
COTTON BROAD WOVEN GOODS OVER 12 INCHES IN WIDTH.....		318,666	2,476,520	2,423,825	2,381,501
DUCK AND ALLIED FABRICS (INCLUDING COMBED DUCK).....		5,900	56,433	56,716	56,435
Ounce duck.....		4,503	46,785	47,258	45,595
Army duck (including shoe duck, wide army duck and plied warp and filling awning stripes).....		1,209	11,043	9,999	10,434
28 1/2" 8 oz. basic weight - all widths.....	1001	498	4,473	4,398	4,679
28 1/2" 10 and 12 oz. basic weight - all widths.....	1006	56	481	1,136	1,207
All other army duck construction including shelter tent.....	1011	655	6,089	4,465	4,548
Flat duck (including enameling duck and single yarn awning stripes).....		3,294	35,742	37,259	35,161
Single filling.....		2,390	23,461	25,475	24,282
29" 8 oz. basic weight - all widths.....	1016	346	5,898	4,749	5,150
29" 10 and 12 oz. basic weight - all widths.....	1021	247	2,374	2,721	2,418
All other single filling flat duck constructions...	1032	1,297	14,689	18,005	16,714
Double filling.....		904	12,281	11,784	10,879
38" 8 oz. basic weight - all widths.....	1046	349	4,837	5,004	4,962
All other double filling flat duck constructions...	1052	555	7,444	6,780	5,917
Number duck (including narrow, sail, wide, and naught)...		640	4,368	3,827	4,553
#5 to #8 inclusive wider than 24".....	1071	257	1,528	1,516	2,014
#9 to #2 inclusive wider than 24".....	1076	239	2,049	1,482	1,712
Paper felts.....	1081	246	285	105	93
Other number ducks.....	1082	98	706	724	734
Hose and belting ducks - thousands of linear yards.....	1086	615	4,362	4,386	5,436
Hose and belting ducks - thousands of pounds.....	1087	...	8,274	7,715	8,696
Filter cloth (including filter twills and special constructions for filtration purposes).....	1091	142	918	745	851
SHEETING AND ALLIED COARSE AND MEDIUM YARN FABRICS.....		84,093	672,285	639,953	628,267
Osnaburgs (single yarn-clean, tinged and part waste-all widths).....		4,357	60,102	50,984	42,838
40"-40 x 28-2.05 and 38 or 40 x 24 to 26 - 2.11 yard...	1200	162	2,256	2,286	3,748
40"-32 x 28-3.55 and 26 or 32 x 24 to 26 - 3.65 yard...	1202	152	2,554	2,748	2,446
All other osnaburg construction.....		4,043	55,292	45,950	36,644
Under 42" wide.....	1209	2,381	37,351	31,667	23,129
42" and wider.....	1208	1,662	17,941	14,283	13,515
Sheetings.....		29,704	261,792	255,099	263,548
Soft filled sheetings for napping.....		10,554	98,380	95,577	89,507
Under 48" wide.....	1215	10,215	95,778	91,150	84,457
48" and wider.....	1216	339	2,602	4,427	5,050
Class A (average yarn numbers up to 15's inclusive)...		5,060	40,641	35,773	41,767
40"-48 x 48 and 48 x 44 - 2.85 yard.....	1220	623	5,245	4,302	4,551
36"-48 x 48 and 48 x 44 - 2.85 yard.....	1222	1,323	10,569	7,825	8,321
All other class "A" constructions.....		3,114	24,827	23,646	28,895
Under 48" wide.....	1223	2,142	16,456	15,375	18,344
48" and wider.....	1224	972	8,371	8,271	10,551
Class B (average yarn numbers 16's to 21's inclusive)...		5,104	46,821	48,836	54,096
40"-48 x 44 and 48 x 40 - 3.25 yard.....	1228	54	1,091	1,107	1,176
40"-48 x 44 and 48 x 40 - 3.75 yard.....	1230	663	8,480	8,918	11,785
40"-44 x 40 - 4.25 yard.....	1240	619	6,482	8,820	10,054
37"-48 x 48 and 48 x 44 - 4.00 yard.....	1242	650	5,854	6,850	6,551
31"-48 x 48 and 48 x 44 - 5.00 yard.....	1244	906	7,542	4,206	7,468
All other class "B" constructions.....		2,212	17,372	18,935	17,062
Under 48" wide.....	1243	1,073	12,181	12,849	12,100
48" and wider.....	1245	1,139	5,191	6,086	4,962

See footnotes at end of table.

OCT 17 1960

DEWEY LIBRARY

SERIES: M-21-1(60)

FOR RELEASE: October 12, 1960

COTTON BROAD WOVEN GOODS QUARTERLY PRODUCTION IN THE UNITED STATES SECOND QUARTER 1960 1947-1949=100

Prepared by Bureau of the Census, Industry Division, Textiles

For sale by the Bureau of the Census, Washington 25, D. C.
Price 10 cents - 35 cents per year

Cotton broad woven fabric production in the second quarter of 1960 was approximately 2 percent below the previous quarter but 1 percent above the second quarter 1959 level.

Production of each of the major fabric classes declined from the previous quarters level. Output of fine cotton goods declined by less than 1 percent while the production of other fabric classes showed decreases of 2 to 11 percent. Compared to the comparable period of 1959, production by fabric class ranged from -13 percent for colored yarn fabrics to +9 percent for napped fabrics including blanketing.

Production of cotton fabrics in the Southern States amounted to 2,247 million linear yards. This was 2 percent below the fourth quarter output. The New England production was 6 percent below output during the previous quarter. Data showing production by Geographic Division and Selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represents total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

DEWEY LIBRARY

FOR RELEASE: January 4, 1961

SERIES: M22T.1(00)-3

COTTON BROAD WOVEN GOODS QUARTERLY PRODUCTION IN THE UNITED STATES THIRD QUARTER 1960 1947-1949=100

Prepared by Bureau of the Census, Industry Division, Textiles

For sale by the Bureau of the Census, Washington 25, D. C.
Price 10 cents - 35 cents per year

Cotton broad woven fabric production in the third quarter of 1960 was approximately 10 percent below the previous quarter and 8 percent below the third quarter 1959 level.

Production of each of the major fabric classes declined from the previous quarters level. The percentage decline varied from 7 to 20 percent. Compared to the comparable period of 1959, production of fine cotton fabrics increased 2 percent while other fabric classes declined 6 to 18 percent.

Production of cotton fabrics in the Southern States amounted to 2,033 million linear yards. This was 9 percent below the second quarter output. The New England production was 11 percent below output during the previous quarter. Data showing production by Geographic Division and Selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represents total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

*Revised.

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The figures are for the 13 week periods ending October 1, 1960, July 2, 1960 and October 3, 1959.²Includes estimated of 25 percent or more for companies whose reports were not received in time for tabulation.³Production in pound not included in any total or sub-total.⁴Sheeting yarn fabrics, 56 square and finer.⁵Includes estimates of 25 percent or more for companies reporting annually with no breakdown of their quarterly production.⁶1959 figures are from the annual summary report issued September 16 with a revision for diaper cloth code 1288. The revised diaper cloth figures for other periods, in thousands of linear yards are: 21004 for first quarter 1959; 19479 for second quarter 1959; and 19921 for fourth quarter 1959.

CURRENT INDUSTRIAL REPORTS

FOR RELEASE: March 30, 1961

SERIES: M22T.1(60)-4

COTTON BROAD WOVEN GOODS QUARTERLY PRODUCTION IN THE UNITED STATES FOURTH QUARTER 1960

Cotton broad woven fabric production in the fourth quarter of 1960 was approximately 2 percent above the previous quarter and 9 percent below the fourth quarter 1959 level.

Production of print cloth yarn fabrics was 6 percent above the previous quarters level. Towels, toweling, and dish cloths and other woven cotton fabrics and specialties output was 4 percent above the previous quarters level, while the production of all other fabric classes showed declines of from 1 to 7 percent. Compared to the comparable period of 1959, production of colored yarn fabrics declined 23 percent, and all other fabric classes declined 1 to 16 percent.

Production of cotton fabrics in the Southern States amounted to 2,053 million linear yards. This was 1 percent above the third quarter output. The New England production was 14 percent above output during the previous quarter. Data showing production by Geographic Division and Selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represents total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woollen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

COTTON BROAD WOVEN GOODS

SUMMARY FOR 1960

Production of cotton broad woven goods in 1960 amounted to 9,366 million linear yards. This represents a decrease of 2 percent from the 1959 level but an increase of almost 4 percent from the 1958 level.

Production of each of the major fabric classes was below the 1959 output, except for fine cotton fabrics which increased 6 percent. Colored yarn fabrics output decreased 14 percent, while the production of the other classes of fabric was 2 to 8 percent below the comparable 1959 levels.

REPORTING OF BLENDS AND MIXTURES--The Census Bureau conducted a survey of the production of fabric blends and mixtures in 1960. The reports filed indicated some classification errors were being made in the regular quarterly survey. As these have generally been corrected for this annual summary, the 1960 data for some items are not completely comparable with the information published for 1959. A more detailed discussion of this question is contained in an appendix to this report.

COVERAGE--Statistics in this publication are based on reports received on Form M22T from manufacturers of broad woven fabrics. Quarterly reports in 1960 were filed by companies accounting for approximately 98 percent of the production of cotton broad woven fabrics. Annual reports (as required under provisions of law, 13 U.S.C. 181) were filed by others. The annual data include estimates amounting to less than one percent for companies that did not report. In a few instances estimates for one or more quarters are also included for other companies.

Inquiries concerning these data should be addressed to the Bureau of the Census, Industry Division, Washington 25, D. C. This publication was prepared under the supervision of Willis K. Jordan, Chief, Foods, Apparel, and Textiles, and Milton Eisen, Chief, Textiles, by Evelyn O. Denny.

*Revised annual and quarterly data.

Revised annual and quarterly data. Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate subtotals and totals in the table.

Withheld to avoid disclosing figures for individual companies. This detail quarterly data are for 13-week periods approximating the calendar quarter.

Quarterly data are for 13-week periods approximating the calendar quarter.

³ Production in pounds not included in any total or subtotal.

⁴Sheeting yarn fabrics. 56 square and finer.

Sheeting yarn fabrics, 36 square and liner.
For 1959, the fabric was defined as "Huck, damask, and jacquard woven (other than terry)."

For 1979, the fabric was defined as "Huck, damask, and Jacquard woven (other than terry)". For 1989, the fabric was defined as "Dish towels and dishcloths and other twill and plain woven towels (including all cotton and chiefly cotton)".

Reporting of Blends and Mixtures

The Census Bureau conducted a study of the production of fabric blends and mixtures in 1960. As part of the review for this survey, the blends and mixtures reports submitted by individual companies were compared to the regular quarterly broad-woven reports previously submitted in order to verify the reporting in both surveys. This comparison indicated that in the quarterly survey there were a number of classification errors involving the reporting of blends and mixtures. This was particularly true for those blends approximating 50 percent of one fiber and 50 percent of another.

Where the differences in the two surveys for a specific code were significant (over 100 thousand yards) and the correct quarterly data could not be readily

determined, correspondence was initiated to obtain revised information. The corrected 1960 quarterly data were then incorporated into this report.

In obtaining these corrections, some companies furnished additional revisions to their quarterly production data. These changes are also reflected in this report. The net changes for the year for cotton, man-made fiber, and wool fabrics are shown below. Where the revisions for individual product lines were significant, the net changes are listed by Product Reference List number. To the extent that such revisions were made for 1960, the data are not completely comparable to the information shown for prior years.

Reference list number	Net change from the previously published quarterly data for 1960 (1,000 linear yards)	Reference list number	Net change from the previously published quarterly data for 1960 (1,000 linear yards)

CURRENT INDUSTRIAL REPORTS

FOR RELEASE: July 10, 1961

SERIES: M22T.1(61)-1

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES
FIRST QUARTER 1961

Cotton broad woven fabric production in the first quarter of 1961 was approximately equal to the output during the previous quarter and 9 percent below the first quarter 1960 level.

Production of duck was 5 percent above the previous quarter's level. The output of napped fabrics and fine cotton goods was 4 percent above the previous quarter's level. Compared to the comparable period of 1960, production of colored yarn fabrics declined 25 percent, and all other fabric classes declined 2 to 24 percent.

Production of cotton fabrics in the Southern States amounted to 2,077 million linear yards. This was 1 percent above the fourth quarter output. The New England production was 9 percent below the output during the previous quarter. Data showing production by Geographic Division and Selected States are shown in table 3.

FABRIC CLASSIFICATION BY FIBER--The Census Bureau is conducting a study of the production of fabric blends and mixtures in 1960. A review of the individual reports indicates that there are problems in the classification of fabric blends and mixtures, particularly those approximately 50 percent of one fiber and 50 percent of another. The resolution of these problems may lead to revision of some of the items included in the quarterly M22T reports, particularly the constructions involving blends or mixtures, for both 1960 and 1961.

COVERAGE--The figures included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woollen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

SERIES: M&T-1(61)-2

FOR RELEASE:
September 28, 1961

BUREAU OF THE CENSUS
Richard M. Scammon, Director

COTTON BROAD WOVEN GOODS QUARTERLY PRODUCTION IN THE UNITED STATES SECOND QUARTER 1961

Cotton broad woven fabric production in the second quarter of 1961 was approximately 3 percent above the previous quarter and 5 percent below the second quarter 1960 level.

Production of colored yarn fabrics was 13 percent above the previous quarter's level. The output of napped fabrics was 8 percent above the previous quarter's level and the production of fine cotton fabrics increased slightly. Production of print cloth yarn fabrics declined 1 percent from the previous quarter, while the output of all other fabric classes increased 5 to 6 percent.

Compared to the comparable period of 1960, production of duck and towels, toweling, and dishcloths increased 2 percent; napped fabrics declined 16 percent; and all other fabric classes declined 1 to 9 percent.

Production of cotton fabrics in the Southern States amounted to 2,141 million linear yards. This was 3 percent above the first quarter output. The New England production was 3 percent below the output during the previous quarter. Data showing production by Geographic Division and Selected States are shown in table 3.

FABRIC CLASSIFICATION BY FIBER--The Census Bureau conducted a study of the production of fabric blends and mixtures in 1960. A review of the individual reports indicated problems in the classification of fabric blends and mixtures, particularly those approximating 50 percent of one fiber and 50 percent of another. Some of the revisions in classification of fabrics based on the blends study are reflected in the revised figures for 1960 and in the figures for the current quarters of 1961. All of the revisions to the 1960 data will be included in the 1960 summary report.

COVERAGE--The figures included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

BUREAU OF THE CENSUS
Richard M. Scammon, Director

COTTON BROAD WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES

THIRD QUARTER 1961

1957-1959=100

Prepared by the Bureau of the Census, Industry Division, Textiles

For sale by the Bureau of the Census, Washington 25, D. C.

Price 10 cents - 35 cents per year

Cotton broad woven fabric production in the third quarter of 1961 was 5 percent below the previous quarter and approximately the same as the third quarter 1960 level.

Production of colored yarn fabrics was 10 percent below the previous quarter's level. The output of napped fabrics was 14 percent below the previous quarter's level and the production of fine cotton fabrics was 8 percent below the previous quarter. Production of print cloth yarn fabrics declined 5 percent from the previous quarter, while the output of all other fabric classes decreased 1 to 6 percent.

Compared to the comparable period of 1960, production of duck increased 9 percent; towels, toweling, and dishcloths increased 7 percent; napped fabrics declined 7 percent; sheeting and allied coarse and medium yarn fabrics and other woven cotton fabrics and specialties increased 3 percent; and all other fabric classes declined 2 to 4 percent.

Production of cotton fabrics in the Southern States amounted to 2,053 million linear yards. This was 4 percent below the second quarter output. The New England production was 15 percent below the output during the previous quarter. Data showing production by geographic division and selected States are shown in table 3.

FABRIC CLASSIFICATION BY FIBER--The Census Bureau conducted a study of the production of fabric blends and mixtures in 1960. A review of the individual reports indicated problems in the classification of fabric blends and mixtures, particularly those approximating 50 percent of one fiber and 50 percent of another. All of the revisions in classification of fabrics based on the blends study are

reflected in the revised figures for 1960 and in the figures for the current quarters of 1961.

COVERAGE--The figures included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woollen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

QUARTERLY ———

ANNUAL - - - - -

Prepared by the Bureau of the Census, Industry Division, Textiles

For sale by the Bureau of the Census, Washington 25, D. C.

Price 10 cents - 35 cents per year

Cotton broad woven fabric production in the fourth quarter of 1961 was 9 percent above the previous quarter and 7 percent above the fourth quarter 1960 level.

Production of colored yarn fabrics was 9 percent above the previous quarter's level. The output of napped fabrics and of fine cotton fabrics was 7 percent above the previous quarter's level. Production of print cloth yarn fabrics increased 8 percent from the previous quarter, while the output of all other fabric classes increased 6 to 14 percent.

Compared to the comparable period of 1960, production of duck increased 22 percent; towels, toweling, and dishcloths increased 17 percent; sheeting and allied coarse and medium yarn fabrics and other woven cotton fabrics and specialties increased 16 percent; and all other fabric classes increased 1 to 8 percent.

Production of cotton fabrics in the Southern States amounted to 2,220 million linear yards. This was 8 percent above the third quarter output. The New England production was 19 percent above the output during the previous quarter. Data showing production by geographic division and selected States are shown in table 3.

FABRIC CLASSIFICATION BY FIBER--The Census Bureau conducted a study of the production of fabric blends and mixtures in 1960. A review of the individual reports indicated problems in the classification of fabric blends and mixtures, particularly those approximating 50 percent of one fiber and 50 percent of another. All of the revisions in classification of fabrics based on the blends study are reflected in the revised figures for 1960 and in the figures for the current quarters of 1961.

COVERAGE--The figures included in this report represent the entire production of cotton broad woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

BUREAU OF THE CENSUS

Richard M. Scammon, Director

COTTON BROAD WOVEN GOODS SUMMARY FOR 1961

Production of cotton broad-woven goods in 1961 amounted to 9,168 million linear yards. This represents a decrease of 2 percent from the 1960 level and 5 percent from the 1959 level.

Production of duck and allied fabrics was 8 percent above the 1960 output: towels, toweling and dishcloths output showed an increase of 5 percent, and the production of other woven cotton fabrics and specialties showed an increase of less than 1 percent.

All other fabric classes showed declines from 1960. Napped fabrics, blankets, and blanketing decreased 11 percent, while the production of the other classes of fabric was 2 to 7 percent below the comparable 1960 levels.

COVERAGE--Statistics in this publication are based on reports received on Form M22T from manufacturers of broad woven fabrics. Quarterly reports in 1961 were filed by companies accounting for approximately 98 percent of the production of cotton broad woven fabrics. Annual reports (as required under provisions of law, 13 U.S.C. 181) were filed by others. The annual data include estimates amounting to less than one percent for companies that did not report. In a few instances estimates for one or more quarters are also included for other companies.

Inquiries concerning these data should be addressed to the Bureau of the Census, Industry Division, Washington 25, D.C. This publication was prepared under the supervision of Milton Eisen, Chief, Foods, Apparel, and Textiles Branch, and Irvin Strauss, Chief, Textiles Section, by Evelyn O. Denny, Statistician.

COTTON BROAD-WOVEN GOODS

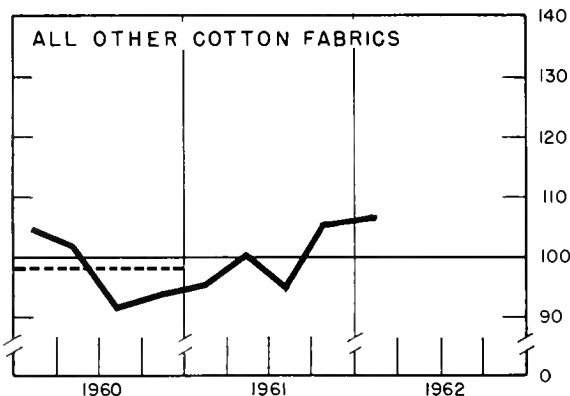

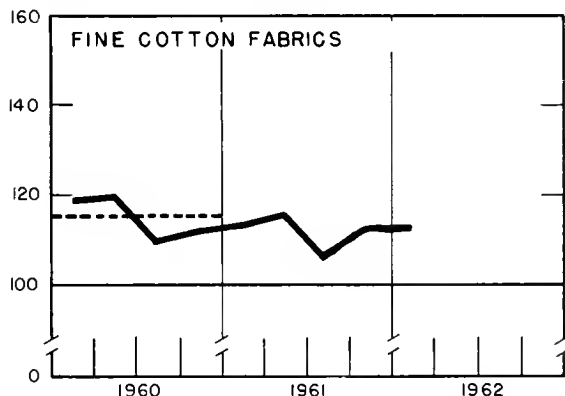

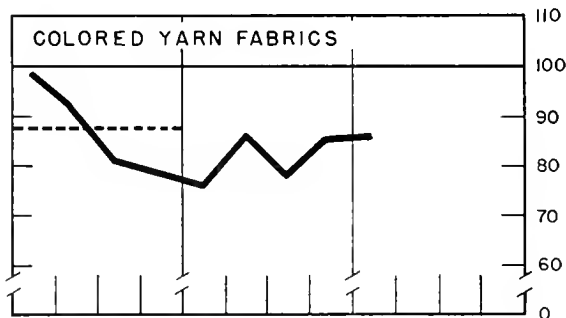

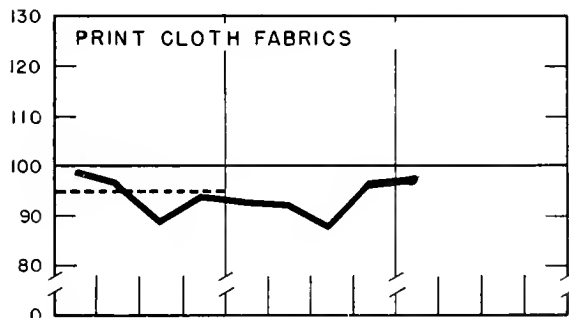

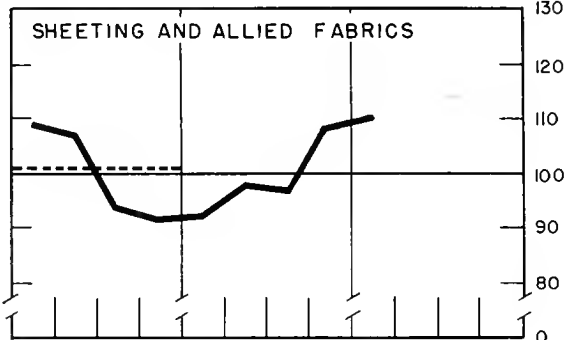

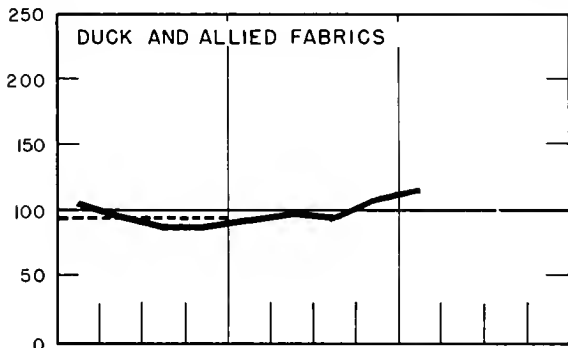

QUARTERLY PRODUCTION IN THE UNITED STATES

FIRST QUARTER 1962

PERCENT

1957-1959=100

PERCENT

QUARTERLY —————

ANNUAL - - - - -

Prepared by Bureau of the Census, Industry Division, Textiles Section

For sale by the Bureau of the Census, Washington 25, D.C.
Price 10 cents - 35 cents per year

Cotton broad-woven fabric production in the first quarter of 1962 was 1 percent above the previous quarter and 8 percent above the first quarter 1961 level.

Production of duck and allied fabrics was 5 percent above the previous quarter's level. The output of all other fabric classes increased from less than 1 percent to 3 percent.

Compared to the comparable period of 1961, duck and allied fabrics increased 21 percent; sheeting and allied coarse and medium fabrics increased 18 percent; towels, toweling and dishcloths increased 16 percent; and colored yarn fabrics increased 12 percent. Fine cotton fabrics decreased 2 percent while all other fabric classes increased from 3 to 8 percent.

Production of cotton fabrics in the Southern States amounted to 2,261 million linear yards. This was 2 percent above the fourth quarter output. The New England production was 5 percent below the output during the previous quarter. Data showing production by geographic division and selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad-Woven Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad-woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

Table 1.--SUMMARY OF PRODUCTION BY CLASS OF FABRIC

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The figures are for the 13 week periods ending March 31, 1962, Dec. 30, 1961, and March 31, 1961.

²Includes estimates of 25 percent or more for companies whose reports were not received in time for tabulation.

³Production in pounds not included in any total or sub-total.

⁴Figures for previous periods are not comparable. Data for code 1093 were not collected separately and a review of the individual reports indicated problems in the classification of chafer ducks. Revisions for all quarters of 1961 will be shown in subsequent reports.

⁵Data for reference list number 1204 is included with reference list number 1207.

Current Industrial Reports

SERIES: M22T.1(62)-2

FOR RELEASE:
October 1, 1962

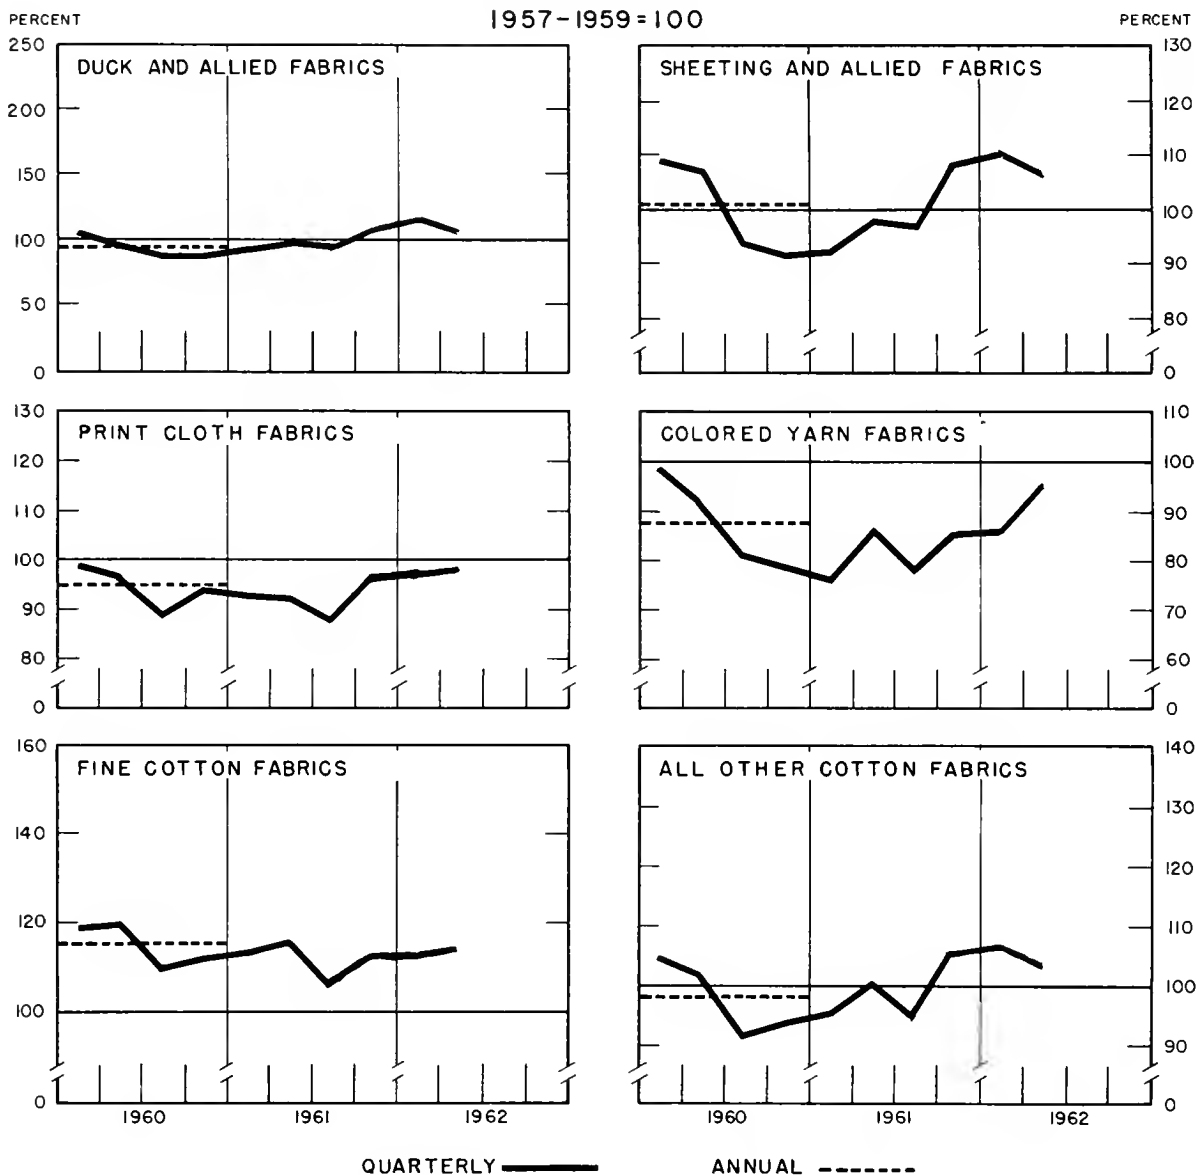

BUREAU OF THE CENSUS

Richard M. Scammon, Director

COTTON BROAD-WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES

SECOND QUARTER 1962

Prepared by Bureau of the Census, Industry Division, Textiles Section

For sale by the Bureau of the Census, Washington 25, D.C.
Price 10 cents - 35 cents per year

Cotton broad-woven fabric production in the second quarter of 1962 was less than 1 percent above the previous quarter and 5 percent above the second quarter 1961 level.

Production of colored yarn fabrics was 10 percent above the previous quarter's level. The output of print cloth yarn fabrics increased 2 percent, and fine cotton fabrics increased 1 percent. All other fabric classes showed declines of less than 1 percent to 4 percent.

Compared to the same period of 1961, production of duck and allied fabrics and towels, toweling, and dishcloths increased 10 percent; sheeting and allied coarse and medium yarn fabrics and colored yarn fabrics increased 9 percent; and print cloth yarn fabrics increased 6 percent. The output of napped fabrics, blankets, and blanketing decreased 6 percent while fine cotton fabrics and other woven cotton fabrics and specialties decreased 1 and 2 percent, respectively.

Production of cotton fabrics in the Southern States amounted to 2,255 million linear yards. This was less than 1 percent below the first quarter output. The New England production was 11 percent above the output during the previous quarter. Data showing production by geographic division and selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all manufac-

turers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad-woven Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber board-woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate sub-totals and totals in the table.

¹The figures are for the 13 week periods ending June 30, 1962, March 31, 1962, and June 30, 1961.

²Includes estimates of 25 percent or more for companies whose reports were not received in time for tabulation.

³Production in pounds not included in any total or sub-total.

⁴Figures for previous periods are not comparable. Data for code 1093 were not collected separately and a review of the individual reports indicated problems in the classification of chafer ducks. Revisions for all quarters of 1961 will be shown in subsequent reports.

⁵Data for reference list number 1204 is included with reference list number 1207.

Current Industrial Reports

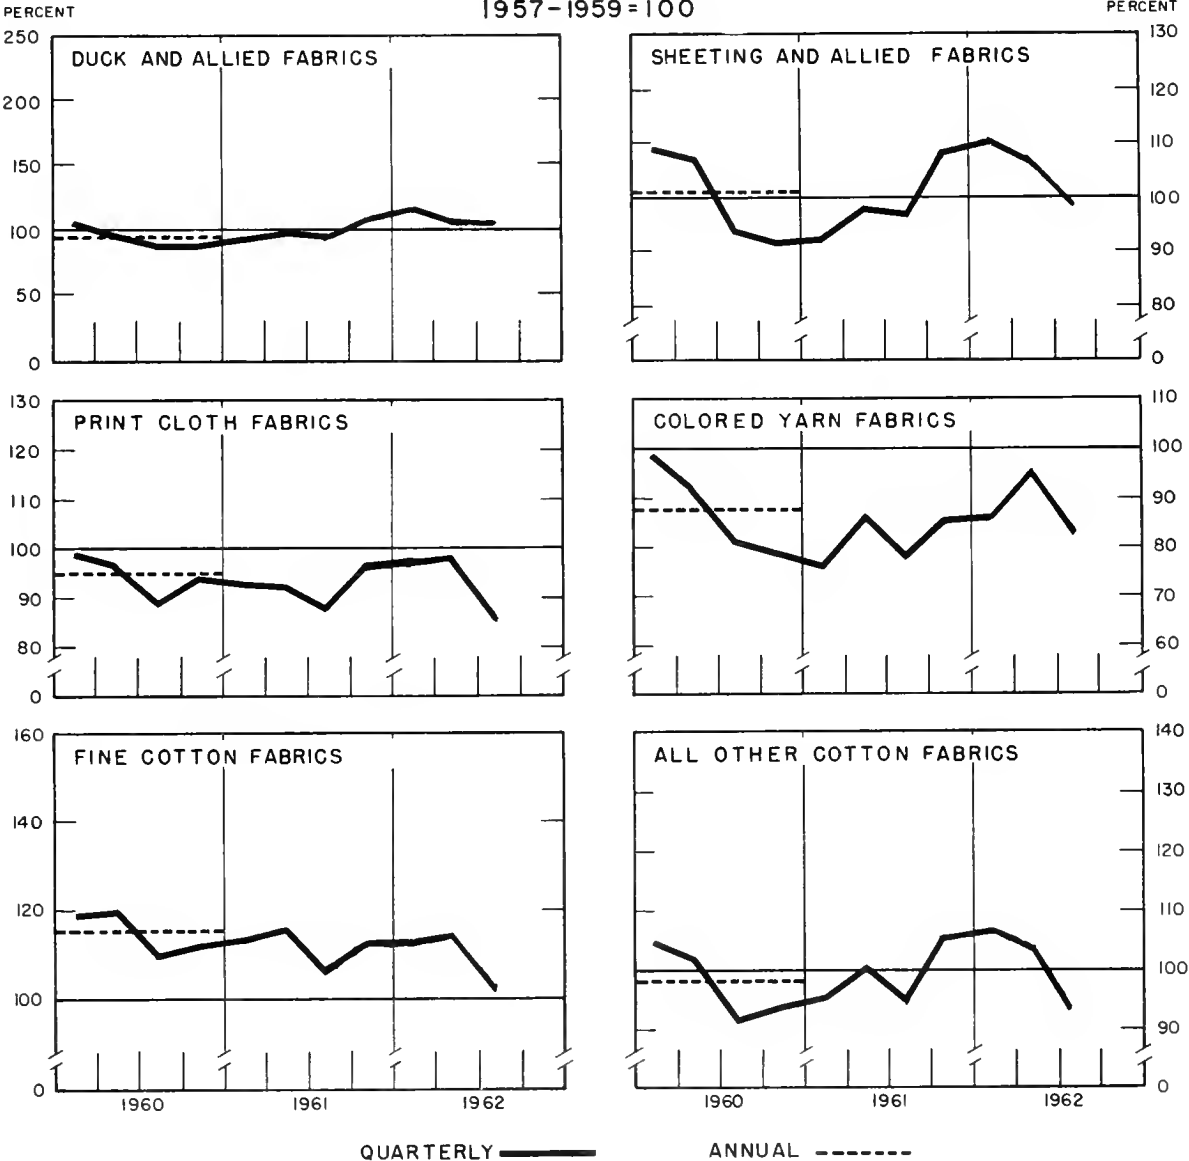

SERIES: M22T.1(62)-3

FOR RELEASE:
December 28, 1962

COTTON BROAD-WOVEN GOODS QUARTERLY PRODUCTION IN THE UNITED STATES

THIRD QUARTER 1962

1957-1959 = 100

Prepared by Bureau of the Census, Industry Division, Textiles Section

For sale by the Bureau of the Census, Washington 25, D.C.
Price 10 cents - 35 cents per year

Cotton broad-woven fabric production in the third quarter of 1962 was 10 percent below the previous quarter and 1 percent below the third quarter 1961 level.

Production of colored yarn fabrics was 14 percent below the previous quarter's level. The output of print cloth yarn fabrics, napped fabrics, and other woven fabrics was 12 percent below the previous quarter's level; and other fabric classes declined 6 to 10 percent.

Compared to the same period of 1961, colored yarn fabrics and towels, toweling, and dishcloths increased 5 percent; duck and allied fabrics increased 3 percent; and sheeting and allied coarse and medium yarn fabrics increased 1 percent. Other woven cotton fabrics and specialties declined 8 percent, and other fabric classes declined 2 to 4 percent.

Production of cotton fabrics in the Southern States amounted to 2,051 million linear yards. This was 9 percent below the first quarter output. The New England production was 28 percent below the output during the previous quarter. Data showing production by geographic division and selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all manufac-

turers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad-woven Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber board-woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

Current Industrial Reports

SERIES: M22T.1(62)-4

BUREAU OF THE CENSUS
Richard M. Scammon, Director

FOR RELEASE:
March 22, 1963

COTTON BROAD-WOVEN GOODS QUARTERLY PRODUCTION IN THE UNITED STATES FOURTH QUARTER 1962

Prepared by Bureau of the Census, Industry Division, Textiles Section

For sale by the Bureau of the Census, Washington 25, D.C.
Price 10 cents - 35 cents per year

Cotton broad-woven fabric production in the fourth quarter of 1962 was 2 percent above the previous quarter and 7 percent below the fourth quarter 1961 level.

Production of colored yarn fabrics were 8 percent above the previous quarter's level. The output of fine cotton goods was 7 percent above the previous quarter's level; and towels, toweling and dishcloths and other woven cotton fabrics and specialties increased 5 percent. Other fabric classes showed slight increases over the previous period, except duck which declined 4 percent.

Compared to the same period of 1961, production of colored yarn fabrics increased 3 percent. All other fabric classes showed decreases ranging from 18 percent for duck to 3 percent for fine cotton fabrics and other woven cotton fabrics and specialties.

Production of cotton fabrics in the Southern States amounted to 2,123 million linear yards. This was 4 percent above the first quarter output. The New England production was 16 percent below the output during the previous quarter. Data showing production by geographic division and selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all manufac-

turers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad-woven Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber board-woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

FOR RELEASE:
November 1, 1963

BUREAU OF THE CENSUS

Richard M. Scamman, Director

COTTON BROAD-WOVEN GOODS SUMMARY FOR 1962

Production of cotton broad-woven goods in 1962 amounted to 9,256 million linear yards. This represents an increase of 1 percent from the 1961 level and a decrease of 1 percent from 1960 level.

Production of duck and allied fabrics was 1 percent above the 1961 output; towels, toweling and dishcloths output showed an increase of 7 percent; the production of colored yarn fabrics increased by 2 percent, and sheeting and allied fabrics increased by 5 percent. Production of other woven cotton fabrics and specialties was unchanged from 1961.

All other fabric classes showed declines from 1961. Napped fabrics, blankets, and blanketing decreased 3 percent, while the production of the other classes of fabric was 1 to 3 percent below the comparable 1961 levels.

REPORTING OF BLENDS AND MIXTURES--The Census Bureau conducted a survey of the production of fabric blends and mixtures in 1962. The reports filed indicated some classification errors were being made in the regular

quarterly survey. As these have generally been corrected for this annual summary, the 1962 data for some items are not completely comparable with the information published for 1961. A more detailed discussion of this question is contained in an appendix to this report.

COVERAGE--Statistics in this publication are based on reports received on Form M22T from manufacturers of broad woven fabrics. Quarterly reports in 1962 were filed by companies accounting for approximately 99 percent of the production of cotton broad woven fabrics. Annual reports (as required under provisions of law, 13 U.S.C. 181) were filed by others. The annual data include estimates amounting to less than one percent for companies that did not report. In a few instances estimates for one or more quarters are also included for other companies.

Inquiries concerning these data should be addressed to the Bureau of the Census, Industry Division, Washington, D.C., 20233. This publication was prepared under the supervision of Milton Eisen, Chief, Foods, Textiles, Apparel and Leather Branch, by Robert J. Nealon and Evelyn O. Denny, Statisticians.

Reporting of Blends and Mixtures

The Census Bureau conducted a study of the production of fabric blends and mixtures in 1962. As part of the review for this survey, the blends and mixtures reports submitted by individual companies were compared to the regular quarterly broad-woven reports previously submitted in order to verify the reporting in both surveys. This comparison indicated that in the quarterly survey there were a number of classification errors involving the reporting of blends and mixtures. This was particularly true for those blends approximating 50 percent of one fiber and 50 percent of another.

Where the differences in the two surveys for a specific code were significant (over 100 thousand yards) and the correct quarterly data could not be readily

determined, correspondence was initiated to obtain revised information. The corrected 1962 quarterly data were then incorporated into this report.

In obtaining these corrections, some companies furnished additional revisions to their quarterly production data. These changes are also reflected in this report. The net changes for the year for cotton, man-made fiber, and wool fabrics are shown below. Where the revisions for individual product lines were significant, the net changes are listed by Product Reference List number. To the extent that such revisions were made for 1962, the data are not completely comparable to the information shown for prior years.

Reference list number	Net change from the previously published quarterly data for 1962 (1,000 linear yards)	Reference list number	Net change from the previously published quarterly data for 1962 (1,000 linear yards)

²Represents total revision for all man-made fiber fabrics. Changes of 1 million yards or more are shown by reference list number.

³Represents total revision for all woolen and worsted fabrics. Changes of 500 thousand linear yards or more are shown by reference list number.

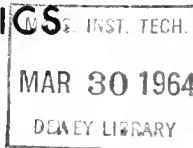

Current Industrial Reports

SERIES: M22T.1(63)-1
Supplement

FOR RELEASE:
March 26, 1964

COTTON BROAD-WOVEN FABRICS AVERAGE WEIGHT AND WIDTH OF FABRICS 1939 - FIRST QUARTER 1963

During the period from 1939 to 1963, the average width of cotton broad-woven fabrics increased 14 percent. In 1939 the average linear yard of cotton fabrics included 1.07 square yards of material. This ratio increased to 1.10 in 1947, to 1.17 during the first quarter of 1958, and to 1.22 during the first quarter of 1963.

The largest proportionate change was reported for fine cotton fabrics. In 1939 the average linear yard of these materials included 1.07 square yards of fabric. By 1958 this ratio had increased to 1.28 square yards per linear yard, and by 1963 it had increased to 1.37 square yards per linear yard.

With the increase in fabric widths, there was, as would be expected, an increase in the weight per linear yard. This is shown by the decline in the number of linear yards per pound of fabric produced. In 1939 a pound of fabric was the equivalent of 3.58 linear yards. This declined to 3.30 in 1947; 3.16 in 1954; 3.09 in the first quarter 1958; and 2.84 in the first quarter of 1963.

With the changes in fabric widths and weights there has also been changes in the relative importance of individual constructions. One result of this has been that, on an overall basis, current cotton fabric production is heavier than in any of the previous periods surveyed. In 1939, 3.82 square yards of fabric

weighed one pound. This was reduced to 3.61 square yards per pound in 1958 and 3.48 in 1963. However, the trend to heavier weights was not uniform for all fabrics, and the opposite movement occurred for some categories.

SURVEY AUTHORIZATION

The survey of fabric production in linear yards, square yards, and pounds for the first quarter of 1963 was conducted as part of the 1963 Census of Manufactures as authorized by an Act of Congress (13 U. S. C.). The questionnaires were mailed in the spring of 1963 as part of a program to reduce the workload, both for manufacturers and the Census Bureau, connected with the main part of the 1963 Census of Manufactures being conducted early in 1964. Data for earlier years were also collected as part of the Censuses of Manufactures for those years.

COVERAGE OF THE 1963 SURVEY

All respondents reporting in the Census quarterly broad-woven fabrics survey (Form M22T) were included in the study of fabric weights and widths. Reports were received from manufacturers accounting for approximately 98 percent of the first quarter 1963 production of cotton fabrics. Based on these reports, ratios of production of square yards and pounds to linear yards were computed for each of the fabrics shown

in table 2. These ratios were then applied to the actual production data, in linear yards, to obtain estimates of the square yards and pounds of fabric produced. For a few fabrics, the ratios were based on reports accounting for less than 75 percent of the total production of that fabric. In such cases, the ratios and the data for square yards and pounds are footnoted to indicate the low coverage.

The linear yards figures shown are from the Current Industrial Reports Series M22T.1(63)-2, Cotton Broad-Woven Goods, with revisions as indicated. Some of these revisions to the first quarter 1963 data were made by respondents when submitting their reports for the second quarter. In the review of this survey of fabric production in linear yards, square yards, and pounds, some errors in classification were found. Correspondence was initiated to obtain correct information; and where the revisions for individual product lines were significant, the changes have been reflected in this report.

SEASONAL INFLUENCES

No analysis has been made of the effect on the 1963 data of seasonal influences which may have increased or decreased the production of specific fabrics during this period.

MAN-MADE FIBER AND WOOL FABRICS

Information regarding the relationship of linear yards to square yards and pounds of fabric production was also collected for man-made fiber and woolen and worsted fabrics. These data will be published in separate reports in the near future.

Inquiries concerning this report should be addressed to the Bureau of the Census, Industry Division, Washington, D.C. 20233.

This publication was prepared under the supervision of Milton Eisen, Chief, Foods, Textiles, Apparel and Leather Branch, by Robert J. Nealon and Evelyn O. Denny, statisticians.

*Revised. NA Not available. ¹In 1939, the following fabric groups were excluded from the category "Print cloth yarn fabrics" and included with "Other woven fabrics and specialties," window shade cloth, gauze diaper cloth, bandage and cheese cloth, and carded poplins. ²In 1939 whip cords and bedford cords were excluded from "Colored yarn fabrics" and included with "Other woven fabrics and specialties." ³In 1939 scrub and wiping cloths are included with "Towels, toweling, and dishcloth fabrics." In later years the fabrics were included in "Other woven fabrics and specialties;" and in 1963 are included in "Sheetings and allied coarse and medium yarn fabrics." ⁴In 1939 carded cotton-and-rayon fabrics, except suitings are included with "Other woven fabrics and specialties."

Table 2.--PRODUCTION OF COTTON BROAD-WOVEN GOODS IN THE UNITED STATES:

Product	Reference list number	First quarter 1963		
		1,000 linear yards	1,000 square yards	1,000 pounds
PRINT CLOTH YARN FABRICS (CARDED YARNS APPROXIMATELY 28's to 42's).....		*763,591	888,196	144,004
Window shade cloth.....	1302	15,503	19,170	3,101
Plain print cloths (total threads per square inch 180 to 100):				
45" - 64 x 56 - 4.75 yard.....	1304	8,749	10,935	1,855
45" - 60 x 48 - 5.35 yard.....	1305	8,845	11,057	1,654
39" - 80 x 80 - 4.00 yard.....	1307	10,000	10,841	2,503
Closely related subcounts of 39" - 80 x 80 - 4.00 yard.....	1308	64,585	72,990	15,790
39" - 68 x 72 - 4.75 yard.....	1310	*9,624	10,536	2,026
38-1/2" - 64 x 60 - 5.35 yard.....	1318	5,505	5,877	1,029
38-1/2" - 64 x 56 - 5.60 yard.....	1322	2,530	2,703	456
38-1/2" - 60 x 48 - 6.25 yard.....	1326	6,328	6,768	1,016
All other constructions:				
Under 36" wide.....	1331	4,794	4,044	1,067
36" wide but under 42".....	1333	100,772	108,896	21,791
42" and wider.....	1335	96,999	132,169	25,657
Fancy print cloths:				
Gauze diaper cloth.....	1342	16,886	19,186	4,768
All other fancy print cloth including pajama checks.....	1347	7,530	9,188	2,752
Bandage cloth (total threads per square inch 99 to 72) all constructions.....	1350	38,147	43,824	4,857
Tobacco and cheesecloth (total threads per square inch 71 and under):				
All widths 20 x 12 construction.....	1354	106,249	118,167	5,533
All widths 17/18 sley x 12/14 pick.....	1358	3,545	3,863	179
All other constructions.....	1362	119,204	129,937	7,259
Carded broadcloths - all widths:				
109 x 58.....	1365	(D)	(D)	(D)
98/100 x 58/60.....	1367	33,176	40,798	10,009
80 x 56/60.....	1369	(D)	(D)	(D)
All other carded broadcloth constructions (including slub yarns).....	1371	46,072	54,271	12,553
Carded poplins (print cloth including slub yarns).....	1378	11,276	13,976	3,994
Three leaf twills (print cloth yarns).....	1382	12,416	14,587	3,252
All other print cloth yarn constructions.....	1386	*15,084	19,259	4,453
COLORLED YARN FABRICS (AVERAGE CARDED YARNS COARSER THAN 35'S).....		114,421	124,521	64,976
Denims, clothing (basis 28" width):				
1.60 yard and 2.00 yard.....	1401	25,257	24,881	18,473
2.20 yard.....	1406	12,534	12,484	7,457
2.45 yard and 3.00 yard.....	1411	6,143	6,054	2,987
All other clothing denims.....	1416	23,240	25,092	15,238
Cottonades, suiting coverts, pin stripes, pin checks, hickory stripes, etc.....	1422	5,173	5,825	2,869
Whipcords, bedford cords, shirting coverts (twill and plain weave).....	1432	(D)	(D)	(D)
Chambrays and colored yarn shirtings (carded yarns):				
36" - 3.90 yard.....	1441	(D)	(D)	(D)
All other carded yarn chambrays and shirtings.....	1446	(D)	(D)	(D)
Ginghams (except combed, part combed and fine carded).....	1453	(D)	(D)	(D)
All other carded suiting woven with colored yarns:				
All cotton.....	1461	(D)	(D)	(D)
Cotton and rayon and/or acetate, and cotton and wool mixtures (51% or more cotton).....	1467	(D)	(D)	(D)
Bed tickings, woven, all constructions.....	1472	14,723	21,426	7,699
TOWELS, TOWELING AND DISHCLOTHS.....		151,093	90,827	55,764
Turkish and terry woven (including washcloths and bathmats).....	1510	98,009	65,796	46,026
All cut mark or border towels other than terry.....	1532	17,512	9,599	3,482
Cabinet and other continuous length toweling other than terry.....	1535	35,572	15,432	6,256

*Revised.

D Withheld to avoid disclosing figures for individual companies.

¹Data for previous years are not available because of fabric reclassification.

²Data for previous years not completely comparable because of fabric reclassification.

³Three leaf herringbone twills (except jeans) are combined with all other sheeting yarn fabrics.

⁴Prior to 1961 separate data were not collected for Bedford cords (no colored yarn). The production of such fabrics were included in code 1299.

⁵Prior to 1958 separate data were not collected for print cloths wider than 39". Such information was included in the category "All other constructions - 36" and under." Closely related subcounts of 39" - 80 x 80 - 4.00 yard were frequently reported with the basic construction and not in the "All other constructions" category.

Current Industrial Reports

COTTON BROAD-WOVEN GOODS QUARTERLY PRODUCTION IN THE UNITED STATES FIRST QUARTER 1963

Prepared by Bureau of the Census, Industry Division, Textiles Section

For sale by the Bureau of the Census, Washington, D.C. 20233
Price 10 cents - 35 cents per year

Cotton broad-woven fabric production in the first quarter of 1963 was 1 percent above the previous quarter and 7 percent below the first quarter 1962 level.

Production of napped fabrics and other woven fabrics was 5 percent above the previous quarter's level. The output of duck and allied fabrics and colored yarn fabrics was 4 percent above the previous quarter's level; and fine cotton fabrics and print cloth yarn fabrics increased 3 and 1 percent, respectively. Other fabric classes showed slight decreases over the previous period.

Compared to the same period of 1962, colored yarn fabrics increased 4 percent. All other fabric classes showed decreases ranging from 10 percent for sheeting and allied coarse and medium yarn fabrics to 2 percent for fine cotton fabrics.

Production of cotton fabrics in the Southern States amounted to 2,141 million linear yards. This was 1 percent above the fourth quarter 1962 output. The New England production was slightly above the output during the previous quarter. Data showing production by geographic division and selected States are shown in table 3.

The Census Bureau conducted a study of the production of fabric blends and mixtures in 1962. A review of the individual reports indicated problems in the classification of blends and mixtures. Some of the revisions in classification based on the blends study are reflected in the revised figures for the fourth quarter of 1962 and in the figures for the current quarter of 1963. All of the revisions to the 1962 data will be included in the 1962 summary report.

Separate data are included in this report for a number of new fabric classifications. As this is the first time that this

information has been collected, the data should be viewed as tentative subject to later revision.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad-woven Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad-woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woollen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

D Withheld to avoid disclosing information for individual companies.

¹Data for each State not shown separately have been withheld to avoid disclosing figures for individual companies. These States are:

New England: Maine, New Hampshire, Massachusetts, Rhode Island, and Connecticut.

South: Maryland, Virginia, Florida, Kentucky, Mississippi, and Arkansas.

North Central and West: Ohio, Illinois, Wisconsin, Missouri, and California.

Current Industrial Reports

OCT 21 1963
DEWEY LIBRARY

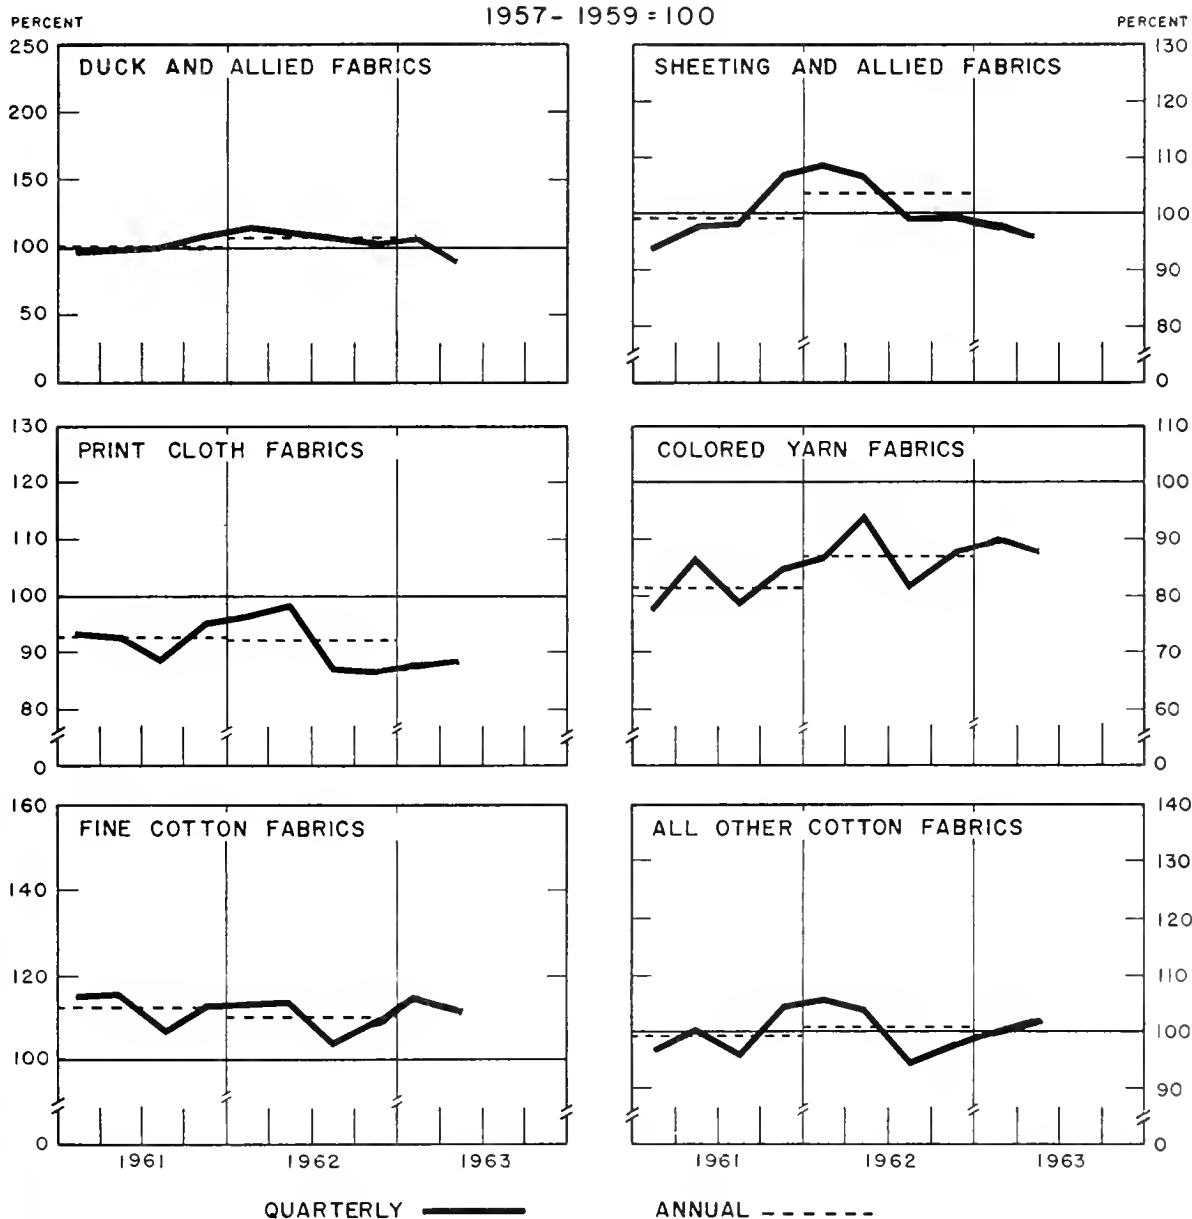

BUREAU OF THE CENSUS

Richard M. Scammon, Director

SERIES: M22T.1(65)-2

FOR RELEASE:
October 15, 1963

COTTON BROAD-WOVEN GOODS QUARTERLY PRODUCTION IN THE UNITED STATES SECOND QUARTER 1963

Prepared by Bureau of the Census, Industry Division, Textiles Section

For sale by the Bureau of the Census, Washington, D.C. 20235
Price 10 cents - 35 cents per year

Cotton broad-woven fabric production in the second quarter of 1963 was approximately the same as the previous quarter and 8 percent below the second quarter 1962 level.

Production of sheeting and allied coarse and medium yarn fabrics was 1 percent below the previous quarter's level and 8 percent below the same quarter of 1962. The output of print cloth yarn fabrics remained the same as the previous quarter's level but declined 11 percent compared to the same period of 1962.

Fine cotton fabric production decreased 4 percent, and duck and allied fabrics and napped fabrics, blankets and blanketing decreased 5 and 6 percent, respectively, compared to the previous quarter's level.

Compared to the same period of 1962, all fabric classes showed decreases ranging from 13 percent for duck and allied fabrics to 1 percent for towels, toweling and dishcloths.

Production of cotton fabrics in the Southern States amounted to 2,114 million linear yards. This was 1 percent below the first quarter 1963 output. The New England production was 17 percent above the output during the previous quarter. Data showing production by geographic division and selected States are shown in table 3.

The Census Bureau conducted a study of the production of fabric blends and mixtures in 1962. A review of the individual reports indicated problems in the classification of fabric blends and mixtures. Some of the revisions in classification based on the blends study are reflected in the figures for the first and second quarters of 1963. However, the revisions to the 1962 data will be included in the 1962 summary report which will be issued at a later date.

The yarn consumption data shown in table 5 include a number of revisions for the first quarter 1963. These changes are primarily due to the reporting of blended yarns. In a number of cases, the cotton content of blends and mixtures had been

included with the 100 percent cotton yarns rather than with the cotton content of blended yarns. While a number of corrections were made, others are still required. As it was not feasible to revise the 1962 data, the information for the two years is not completely comparable.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 4 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report is collected on Form M22T, Broad-woven Fabrics, from all weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad-woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woolen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

FOR RELEASE:
January 6, 1964

COTTON BROAD-WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES

THIRD QUARTER 1963

Prepared by Bureau of the Census, Industry Division, Textiles Section

For sale by the Bureau of the Census, Washington, D.C. 20233
Price 10 cents - 35 cents per year

Cotton broad-woven fabric production in the third quarter of 1963 was 8 percent below the previous quarter and 5 percent below the third quarter 1962 level.

Production of napped fabrics, blankets and blanketing was 12 percent below the previous quarter's level. The output of print cloth fabrics declined 10 percent; fine cotton fabrics declined 9 percent; and other fabric classes declined 4 to 7 percent from the previous quarter's level.

Compared to the same period of 1962 colored yarn fabrics increased 5 percent; other woven cotton fabrics and specialties increased 6 percent; and the production of towels, toweling and dishcloths was approximately the same. Napped fabrics, blankets, and blanketing declined 13 percent and duck and allied fabrics declined 10 percent. Other fabric classes declined 4 to 8 percent.

Production of cotton fabrics in the Southern States amounted to 1,963 million linear yards. This was 7 percent below the second quarter 1963 output. The New England production was 16 percent below the output during the previous quarter. Data showing production by geographic division and selected States are shown in table 3.

The Census Bureau conducted a study of the production of fabric blends and mixtures in 1962. A review of the individual reports indicated problems in the classification of fabric blends and mixtures. All of the revisions in classification based on the blends study are reflected in the revised figures for 1962 and in the figures for the current quarters of 1963.

The yarn consumption data shown in table 5 include a number of revisions made for 1963. These changes are primarily due to the reporting of blended yarns. In a number of cases, the cotton content of blends and mixtures had been included with the 100 percent cotton yarns rather than with

the cotton content of blended yarns. As it was not feasible to revise the 1962 data, the information for the two years is not completely comparable.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report, is collected on Form M22T, Broad-woven Fabrics, from all known weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all known weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics is excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad-woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woollen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

Table 1.--SUMMARY OF PRODUCTION BY CLASS OF FABRIC

(Thousands of linear yards)

Type of goods	July- Sept. 1963 (preliminary)	April- June 1963	July- Sept. 1962	Percent change July-Sept. 1963 from--

Current Industrial Reports

MAY 4 1964
DEWEY LIBRARY

SERIES: M22T.1(63)-

FOR RELEASE:
May 1, 1964

CHANGE SHEET

Cotton Broad-Woven Goods
Quarterly Production in the United States
Fourth Quarter 1963

The following corrections should be made in table 2 in the report issued March 27, 1964. Other data are not affected by this change.

Type of goods	Reference list number	Looms operating Dec. 28, 1963	
		As revised	As published
COTTON BROAD-WOVEN GOODS OVER 12 INCHES IN WIDTH.....		275,388	274,78
Towels, toweling, and dishcloths.....		12,587	11,98
Turkish and terry woven (including wash- cloths and bathmats).....	1510	8,931	8,33

2 Cotton broad-woven fabric production in the fourth quarter of 1963 was 7 percent above the previous quarter and less than 1 percent below the fourth quarter 1962 level.

Production of duck and allied fabrics was 13 percent above the previous quarter's level, and towels, toweling and dishcloths increased 12 percent. The output of print cloth yarn fabrics and colored yarn fabrics increased 8 percent. All other fabric classes showed increases of from 3 to 7 percent.

Compared to the same period of 1962 other woven cotton fabrics and specialties increased 8 percent; towels, toweling, and dishcloths increased 7 percent; duck and allied fabrics increased 6 percent; and colored yarn fabrics 4 percent. Napped fabrics, blankets, and blanketing declined 12 percent; fine cotton fabrics declined 5 percent but other fabric classes were less than 1 percent below the same period of 1962.

Production of cotton fabrics in the Southern States amounted to 2,091 million linear yards. This was 7 percent above the third quarter 1963 output. The New England production was 9 percent above the output during the previous quarter. Data showing production by geographic division and selected States are shown in table 3.

The Census Bureau conducted a study of the production of fabric blends and mixtures in 1962. A review of the individual reports indicated problems in the classification of fabric blends and mixtures. All of the revisions in classification based on the blends study are reflected in the revised figures for 1962 and in the figures for the current quarters of 1963.

The yarn consumption data shown in table 5 include a number of revisions made for 1963. These changes are primarily due to the reporting of blended yarns. In a number of cases, the cotton content of blends and mixtures had been included with the 100 percent cotton yarns rather than with

the cotton content of blended yarns. As it was not feasible to revise the 1962 data, the information for the two years is not completely comparable.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 3 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES

The information contained in this report, is collected on Form M22T, Broad Fabrics (Except Knit): Woven, Nonwoven, and Felts, from all known weaving mills. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all known weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics are excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad-woven fabrics.

WOOLEN AND WORSTED MILLS--Mills with woollen and worsted machinery that are primarily producing cotton fabrics do not report yarn consumption figures.

D Withheld to avoid disclosing figures for individual companies. This detail figure is included, however, in the appropriate subtotals and totals in the table.

¹The figures are for the 13-week periods ending December 28, 1963, September 28, 1963, and December 29, 1962.

²Data for 1962 are from the Cotton Broad Woven Fabrics Annual Summary released on November 1, 1963, with revisions for Code 1203, Industrial wiping fabrics and cloths. For 1962, these fabrics were classified under Code 1204 (soft filled osnaburgs for industrial wiping fabrics and cloths) and Code 1763 (Industrial wiping fabrics and cloths). Code 1768 was under Fabric Class "Other woven cotton fabrics and specialties."

³Includes estimates of 25 percent or more for companies whose reports were not received in time for tabulation.

⁴Production in pounds not included in any total or subtotal.

⁵For 1962, Code 1881 is included in Code 1813; Code 1887 is included in Code 1877; Code 1885 is included in Code 1839; Code 1887 is included in Code 1871; and Code 1889 is included in Code 1873.

BUREAU OF THE CENSUS

Richard M. Scamman, Director

COTTON BROAD-WOVEN GOODS SUMMARY FOR 1963

Production of cotton broad-woven goods in 1963 amounted to 8,759 million linear yards, the lowest amount since 1949 when production was 8,417 million linear yards. The 1963 output represents a decrease of 5 percent from the 1962 aggregate and was 4 percent below the 1961 level.

Production of colored yarn fabrics increased by 2 percent compared with 1962 while toweling and dish-cloth fabric showed a slight increase. Output of fabric included in the class "Other woven cotton fabrics and specialties" was 2 percent above the comparable 1962 level.

All other fabric classes showed declines from 1962. Napped fabrics, blankets, and blanketing decreased 13 percent, while the production for each of the other major classes of fabric declined approximately 6 percent.

The Census Bureau conducted a study of the production of fabric blends and mixtures in 1962. A review of the individual reports indicated problems in the classification of fabric blends and mixtures. All of the

revisions in classification, based on the blends study, are reflected in the figures for 1962 and 1963. Data for previous years have not been corrected.

The yarn consumption data shown in table 5 include a number of revisions made for 1963. These changes are primarily due to the reporting of blended yarns. In a number of cases, the cotton content of blends and mixtures had been included with the 100 percent cotton yarns rather than with the cotton content of blended yarns. As it was not feasible to revise the 1962 data, the information for the two years is not completely comparable.

COVERAGE--Statistics in this publication are based on reports received on Form M22T from manufacturers of broad-woven fabrics. Quarterly reports in 1963 were filed by companies accounting for approximately 99 percent of the production of cotton broad-woven fabrics. Annual reports (as required under provisions of law, 13 U.S.C.181) were filed by others. The annual data include estimates amounting to less than one percent for companies that did not report. In a few instances, estimates for one or more quarters are also included for other companies.

COTTON BROAD-WOVEN GOODS

QUARTERLY PRODUCTION IN THE UNITED STATES

FIRST QUARTER 1964

Prepared by Bureau of the Census, Industry Division, Textiles Section

For sale by the Bureau of the Census, Washington, D.C. 20233
Price 25 cents - \$1.25 per year

Cotton broad-woven fabric production in the first quarter of 1964 was 7 percent above the previous quarter and about 1 percent below the first quarter 1963 level.

Production of duck and allied fabrics was 7 percent above the previous quarter's level, and colored yarn fabrics increased 15 percent. Blanketing production was likewise substantially above the fourth quarter, but output of sheetings and print cloth showed little change.

Total production of cotton fabrics was about the same as last year but 8 percent below the high level of 1962. Duck and allied fabrics, colored yarn fabrics, and toweling were substantially above last year's level, while other classes registered declines.

Increased output compared to the fourth quarter 1963 was recorded in North Carolina, Georgia, Alabama, and Texas as shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose re-

ports were not received in time for tabulation. Such companies accounted for approximately 3 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES--The information contained in this report is collected on Census Form M22T, Broad Fabrics (Except Knit): Woven, Nonwoven, and Felts. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all known weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics are excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad-woven fabrics.

FOR RELEASE:
October 13, 1964

COTTON BROAD-WOVEN GOODS QUARTERLY PRODUCTION IN THE UNITED STATES SECOND QUARTER 1964

Cotton broad-woven fabric production in the second quarter of 1964 was 1 percent above the previous quarter and about 1 percent above the second quarter 1963 level.

Production of napped fabrics, blankets and blanketing was 9 percent above the previous quarter's level and colored yarn fabrics increased 6 percent. Sheetings, toweling and other fabrics and specialties showed increases from 2 to 4 percent while output of print cloth yarn fabrics showed little change. Duck and allied fabrics production showed a decline of 6 percent and fine cotton fabrics a decline of 4 percent.

Compared to the same period of 1963 colored yarn fabrics increased 20 percent; duck and allied fabrics and other fabrics and specialties increased 8 percent; toweling increased 6 percent; and sheetings and napped fabrics and blanketing 5 percent. Fine cotton fabrics decreased 10 percent and print cloth yarn fabrics 3 percent.

Increased output compared to the first quarter 1964 was recorded in Georgia, Tennessee, Alabama, and Texas shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates

have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES--The information contained in this report is collected on Census Form M22T, Broad Fabrics (Except Knit): Woven, Nonwoven, and Felts. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all known weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics are excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad-woven fabrics.

Cotton Broad-Woven Goods

MASS. INST. TECH.
JAN 5 1965
DEWEY LIBRARY

FOR RELEASE: December 23, 1964

SERIES: M22T.1(64)-3

Third Quarter 1964

For sale by the Bureau of the Census, Washington, D.C. 20237
Price 25 cents - \$1.25 per year

U. S. DEPARTMENT OF COMMERCE Luther H. Hodges, Secretary
BUREAU OF THE CENSUS Richard M. Scammon, Director

Cotton broad-woven fabric production in the third quarter of 1964 was 5 percent below the previous quarter and 4 percent above the third quarter 1963 level.

All fabric classes showed decreases from the previous quarter's level. Colored yarn fabrics declined 11 percent, fine cotton fabric 8 percent, and toweling 5 percent. The output of other fabrics showed decreases from 2 to 4 percent.

Compared to the same period of 1963, napped fabrics, blankets, and blanketing increased 21 percent; colored yarn fabrics increased 16 percent; and duck and allied fabrics increased 9 percent. All other fabric classes showed increases, except for fine cotton fabrics which declined 5 percent.

Decreased output compared to the second quarter 1964 was recorded in all States. Data showing production by geographic division and selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such

companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES--The information contained in this report is collected on Census Form M22T, Broad Fabrics (Except Knit): Woven, Nonwoven, and Felts. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all known weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing man-made fiber fabrics are excluded from this report and included in the Current Industrial Reports relating to man-made fiber broad-woven fabrics.

U. S. DEPARTMENT OF COMMERCE
BUREAU OF THE CENSUS

John T. Connor, Secretary

Cotton broad-woven fabric production in the fourth quarter of 1964 was 9 percent above the previous quarter and 6 percent above the fourth quarter 1963 level.

All fabric classes except napped fabrics showed increases from the previous quarter's level. Duck and allied fabrics increased 19 percent; toweling, 11 percent; print cloth yarn fabrics, 10 percent. Other fabric classes showed increases from 3 to 8 percent, except for napped fabrics which declined 1 percent.

Compared to the same period of 1963 napped fabrics increased 17 percent; duck and allied fabrics increased 15 percent; and sheetings and colored yarn fabrics increased 11 percent. All other fabric classes showed increases, except for fine cotton fabrics which declined 3 percent.

Increased output compared to the third quarter 1964 was recorded in all States. Data showing production by geographic division and selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12-inches wide. Estimates have been included for all manufacturers whose reports

were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES--The information contained in this report is collected on Census Form M22T, Broad Fabrics (Except Knit): Woven, Nonwoven, and Felts. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all known weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Where cotton fabrics are secondary products of a mill primarily producing man-made fiber fabrics, yarns consumed in their manufacture are excluded from this report. They are included in Current Industrial Reports relating to man-made fiber broad-woven fabrics.

Cotton Broad-Woven Goods

Summary for 1964

FOR RELEASE: November 11, 1965

SERIES: M22T.1(64)-5

This publication presents consolidated and revised statistics for 1964 previously published in preliminary form in quarterly releases.

COVERAGE--The statistics are based on reports received on Census Forms M22T or MN-22T from weaving mills, accounting for over 90 percent of the total production of

cotton broad-woven fabrics.

Production figures as reported on the 1965 Census of Manufactures are shown below compared with the M22T data for that year. Most of the discrepancies are due to unexplained differences in the figures reported by the same mills in the two surveys. The comparison indicated virtually complete coverage in the M22T survey.

Type of fabric	Total production in 1965 as reported in--		Percent differ- ence Census/ M22T
	Census of Manufacture	Form M22T	
Cotton broad-woven goods, total.....	7,611,766	7,754,242	+1.5
Duck and allied fabrics.....	261,731	212,78	-10.4
Sheeting and allied cloth, 20 to 24 in. wide, yarn fabrics.....	3,435,302	3,443,301	+1.7
Print cloth, yarn fabrics.....	3,044,479	3,074,473	+1.3
Colored yarn fabrics.....	472,000	450,000	-4.7
Towels, dressing, and flannel, 24 in. and wider.....	619,300	617,539	-0.3
Knitted fabrics, 24 in. and wider.....	157,117	157,000	-0.1
Fine cotton fabrics.....	1,520,445	1,510,001	-0.7
Other woven cotton fabrics and specialties.....	450,000	440,001	-2.2

COTTON WOVEN GOODS OVER 12 INCHES IN WIDTH, TOTAL																	
Duck and allied fabrics (including combed duck).....	3,426,112	3,759,292	2,327,441	2,151,074	1,255,952	1,271,145	2,215,925	2,062,921	3,235,132	2,246,666						
Curve duck.....	233,716	312,798	65,524	54,139	55,517	59,624	56,225	49,804	52,118	54,756						
Army duck, including howe duck, wide Army duck, and pilled warp and filling (wing stripes).....	106,441	155,847	46,560	35,527	35,527	43,537	4,521	36,044	27,621	41,286						
1001 20" 10 oz. basic weight - all widths.....	40,116	38,524	10,453	9,521	10,150	7,447	4,421	8,867	4,441	10,575						
1002 20" 10 oz. basic weight - all widths.....	17,967	17,113	4,873	3,484	4,106	4,106	4,227	4,122	4,265	4,574						
1006 20" 10 oz. basic weight - all widths.....	2,469	2,310	591	656	515	509	486	505	789	526						
All other Army duck constructions, including sheeter tent.....	20,780	19,301	4,074	4,876	5,541	5,389	5,104	4,240	4,447	5,470						
Flat duck, including enamel duck and single yarn wing stripes.....	126,335	117,023	34,126	29,806	28,741	30,600	31,370	27,132	22,080	30,691						
Single filling.....	45,792	84,747	2,346	22,400	22,400	21,046	23,273	21,200	20,801	19,523						
1010 20" 10 oz. basic weight - all widths.....	14,005	15,488	3,343	3,523	3,774	3,297	3,025	3,513	3,746	3,374						
1021 20" 10 oz. basic weight - all widths.....	11,278	10,267	3,344	2,660	2,392	2,473	3,080	2,456	2,076	2,655						
All other single filling flat duck construction.....	70,499	60,342	22,310	16,643	16,764	14,771	17,169	14,901	14,974	13,494						
Double filling.....	30,543	32,226	4,122	5,406	5,461	4,554	7,797	5,482	7,274	11,168						
1046 30" 3 oz. basic weight - all width.....	8,935	10,121	2,536	1,411	1,354	3,994	2,825	2,105	1,546	3,597						
All other double filling flat duck construction.....	21,008	22,105	6,256	4,446	4,027	6,550	4,974	3,877	5,693	7,571						
Numbered duck (including narrow, sail, wide, and rough).....	15,444	13,951	4,111	4,097	3,612	3,634	2,374	3,617	3,774	3,721						
#5 to #10 inclusive wider than 24".....	6,318	5,486	1,725	1,553	1,436	1,562	1,054	1,374	1,575	1,476						
#9 to #12 inclusive wider than 24".....	6,199	5,972	1,544	1,725	1,473	1,440	1,243	1,549	1,614	1,514						
Paper felts.....	129	319	129	141	129	129	129	(2)	(2)	(3)						
Other numbered duck.....	2,511	2,174	713	692	558	552	512	579	463	620						
Hose and belting ducks - thousands of linear yards.....	15,497	15,827	4,695	4,474	4,675	4,653	4,291	3,726	3,404	3,391						
Hose and belting ducks - thousands of pounds.....	32,745	29,316	8,249	7,604	8,330	8,502	7,574	7,091	7,024	6,637						
Filter twill and chain cloth.....	2,500	2,693	614	613	666	602	673	692	715	618						
Single and plied yarn chafers (except chafers fabrics for tires).....	9,980	8,644	2,478	2,519	2,486	2,447	2,142	1,968	2,142	1,744						
Miscellaneous ducks and allied fabrics.....	20,894	16,421	5,060	4,168	4,985	6,641	5,347	3,742	3,434	3,444						
Sheeting and allied coarse and medium yarn fabrics.....	2,528,792	2,394,551	663,154	613,739	635,540	610,319	606,488	573,154	605,618	609,441						
Onaburgs (single yarn - clean, tinged and part waste - all widths).....	262,655	238,910	68,018	65,587	64,474	64,556	61,121	57,555	59,497	60,757						
40" - 42 x 26 - 2.05 and 39 or 40 x 24 to 26 - 3-11 yard.....	8,275	4,818	1,375	1,445	4,011	1,344	1,625	1,302	1,114	772						
40" - 32 x 28 - 3.55 and 26 or 32 x 24 to 26 - 7.65 yard.....	31,313	15,996	8,182	8,766	6,152	8,219	3,641	3,512	3,667	3,176						
Soft filled onaburgs for industrial wiping fabrics.....	39,504	36,659	10,676	10,120	9,552	9,156	8,816	8,598	9,374	8,846						
All other onaburg constructions.....	185,557	185,437	47,785	45,266	44,774	45,787	46,104	44,183	45,222	47,923						
Under 42" wide.....	89,151	81,917	22,757	22,592	21,409	24,680	24,870	25,637	24,650	26,730						
42" and wider.....	94,566	81,520	25,028	22,524	23,370	23,644	21,239	18,546	20,542	21,195						
Sheeting.....	867,909	862,240	237,644	208,365	210,430	210,422	213,990	204,604	219,340	224,356						
Soft filled sheeting for napping.....	302,357	317,945	82,219	71,483	72,917	75,738	75,055	74,301	86,072	82,427						
Under 42" wide.....	261,577	291,190	69,579	63,408	63,408	66,703	67,234	67,195	79,998	76,771						
42" and wider.....	40,980	26,755	12,640	10,131	9,009	9,030	7,821	7,156	6,082	5,656						
Class A (average yarn number up to 15's inclusive).....	149,274	142,615	37,465	35,071	36,869	39,869	37,940	33,805	33,975	46,405						
40" - 46 x 45 and 48 x 44 - 2.85 yard.....	16,321	18,662	4,197	4,066	4,958	4,560	4,957	4,405	4,174	4,444						
36" - 42 x 45 and 43 x 44 - 2.85 yard.....	40,092	41,650	8,249	8,795	10,340	12,108	8,481	9,196	11,505	11,505

Table 2.—PRODUCTION OF COTTON BROAD-WOVEN GOODS, BY TYPE, BY QUARTER—Continued

[illegible]

See footnote at end of table.

Table 2. -- PRODUCTION OF COTTON BROAD-WOVEN GOODS, BY TYPE, BY QUARTER--Continued

[illegible]
$$= \text{Re} [F_{\text{eq}} + i \frac{1}{2} \frac{dF_{\text{eq}}}{d\omega}]$$

to attempt to avoid disclosure to individual companies. This disclosure is included, however, in the appropriate column and total in the table.

DATA ON

• *First/last name of the author*

[illegible]

Only data for T-wave, pooled approximately the standard quartet, typically for a median of 10 percent or more for a tallism's reporting annually with a break in of their quarterly product. A.

2004, 2005, and 2006. The mean of the percent of GDP in total arable land is reported, along with the standard deviation.

1. The first part of the paper is devoted to the study of the properties of the function $f(x)$ defined by the equation

Cotton Broad-Woven Goods

Dewey

First Quarter 1965

FOR RELEASE: August 6, 1965

D255

MISS INST TECH

SERIES: M22T.1(65)-1

AUG 17 1965

LIBRARIES

Cotton broad-woven fabrics production in the first quarter of 1965 was 1 percent above the previous quarter and 6 percent above the first quarter 1964 level.

Production of colored yarn fabrics and napped fabrics, blankets, and blanketing was 10 percent above the previous quarter's level. Sheetings, towelings, and fine cotton fabrics increased 2 percent. Duck and allied fabrics and print cloth yarn fabrics showed a decline of 1 percent and other fabrics and specialties, a decline of 4 percent.

Compared to the same period of 1964 napped fabrics increased 23 percent; colored yarn fabrics, 12 percent; sheetings and towelings, 11 percent; duck and allied fabrics, 2 percent; and print cloth yarn fabrics, 4 percent. Fine cotton fabrics and other fabrics and specialties decreased 2 percent.

Increased output compared to the fourth quarter of 1964 was recorded in North Carolina, Georgia, Tennessee, and Alabama while production in South Carolina and Texas remained at about the same level. Data showing production by geographic division and selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over

12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES--The information contained in this report is collected on Census Form M22T, Broad Fabrics (Except Knit): Woven, Nonwoven, and Felts. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all known weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Where cotton fabrics are secondary products of a mill primarily producing man-made fiber fabrics, yarns consumed in their manufacture are excluded from this report. They are included in Current Industrial Reports relating to man-made fiber broad-woven fabrics.

Table 1.--SUMMARY OF PRODUCTION, BY CLASS OF FABRIC
(Thousands of linear yards)

Cotton Broad-Woven Goods

Second Quarter 1965

FOR RELEASE: October 15, 1965

SERIES: M2T,1(65)-2

Cotton broad-woven fabrics production in the second quarter of 1965 was approximately the same as the previous quarter and 5 percent above the second quarter 1964 level.

Production of colored yarn fabrics and napped fabrics, blankets, and blanketing was 7 percent below the previous quarter's level. Sheetings, towelings, and fine cotton fabrics were approximately the same. Duck and allied fabrics and print cloth yarn fabrics showed an increase of 2 percent and other fabrics and specialties, an increase of 3 percent.

Compared to the same period of 1964 napped fabrics increased 13 percent; sheetings and towelings 7 percent; duck and allied fabric, 8 percent; and print cloth yarn fabrics, 7 percent. Fine cotton fabrics and other fabrics and specialties decreased 1 percent; and colored yarn fabrics, 5 percent.

Increased output compared to the first quarter of 1965 was recorded in Georgia, Tennessee, and Texas, while production in South Carolina and North Carolina remained at about the same level. Data showing production by geographic division and selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over

12 inches wide. Estimates have been included for all manufacturers whose reports were not received in time for tabulation. Such companies accounted for approximately 2 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES--The information contained in this report is collected on Census Form M22T, Broad Fabrics (Except Knit): Woven, Nonwoven, and Felts. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all known weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce viscose or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Where cotton fabrics are secondary products of a mill primarily producing man-made fiber fabrics, yarns consumed in their manufacture are excluded from this report. They are included in Current Industrial Reports relating to man-made fiber broad-woven fabrics.

Cotton Broad-Woven Goods

Third Quarter 1965

D255

Copy #7

FOR RELEASE: January 11, 1966

SERIES: M22T-1965-3

Cotton broad-woven fabric production in the third quarter of 1965 was 3 percent below the previous quarter and 2 percent above the third quarter 1964 level.

Duck and allied fabrics showed an increase of 1 percent from the previous quarter level, but all other fabric classes showed decreases. Colored yarn fabrics decreased 17 percent and napped fabric, blanket, and blanketing 14 percent. The output of other fabric class decreases from 6 to 3 percent.

Compared to the same period of 1964, duck and allied fabrics increased 9 percent, toweling 7 percent, print cloth yarn fabrics 6 percent, and sheeting 2 percent. The output of colored yarn fabrics decreased 11 percent, and other fabric classes decreases from 3 to 1 percent.

Decreased output compared to the second quarter of 1965 was recorded in all States except Tennessee which remained at about the same level. State-wide production by geographic division and selected States shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabric over 12 inches wide. Estimates have been included for all

manufacturers whose reports were not received in time for publication. Such companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES--The information contained in this report is collected on Census Form M22T, Broad Fabric (except Knit): Woven, Nonwoven, and Felts. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes two or more buildings at the same or nearby locations. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all known weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce tire cord or man-made fiber or wool fabrics a secondary product, the yarn consumption or loom activity for such fabrics would be included in this report. Where cotton fabrics are secondary products of a mill primarily producing man-made fiber fabrics, yarn consumed in their manufacture are excluded from this report. They are included in Current Industrial Reports relating to man-made fiber broad-woven fabrics.

Cotton Broad-Woven Goods

Fourth Quarter 1965

Dewey

MASSACHUSETTS

FOR RELEASE: April 1, 1966

SERIES: M22T.1(65)-4

Cotton broad-woven fabric production in the fourth quarter of 1965 was 6 percent above the previous quarter and 1 percent below the fourth quarter 1964 level.

All fabric classes except napped fabrics showed increases from the previous quarter's level. Duck and allied fabrics increased 13 percent; colored yarn fabric, toweling, and other fabrics and specialties increased 3 percent. Other fabric classes showed increases from 1 to 5 percent, except for napped fabrics which declined 2 percent.

Compared to the same period of 1964, print cloth yarn fabrics and toweling increased 4 percent and duck and allied fabrics 2 percent. The output of colored yarn fabrics decreased 11 percent and other fabric classes decreased 2 to 6 percent.

Increased output compared to the third quarter of 1965 was recorded in all States (published) except Texas which decreased 7 percent. Data showing production by geographic division and selected States are shown in table 3.

COVERAGE--The figures included in this report represent the entire production of cotton broad-woven fabrics over 12 inches wide. Estimates have been included for all

manufacturers whose reports were not received in time for tabulation. These companies accounted for approximately 1 percent of the total production.

COVERAGE OF INDIVIDUAL TABLES--The information contained in this report is collected on Census Form M22T, Broad Fabrics (except Knit): Woven, Nonwoven, and Felts. A separate report is obtained from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constituted two or more buildings at the same or nearby location. In the tabulation of these reports, the production figures shown in tables 1, 2, and 3 represent total production of cotton fabrics by all known weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produce textile or man-made fiber or wool fabrics as secondary products, the yarn consumption or loom activity for such fabrics would be included in this report. Where cotton fabrics are secondary products of a mill primarily producing man-made fiber fabrics, yarn consumed in their manufacture are excluded from this report. They are included in Current Industrial Reports relating to man-made fiber broad-woven fabrics.

Table 1.--SUMMARY OF PRODUCTION, BY CLASS OF FABRIC

(Thousands of linear yards)

122T.1(66)-4

Current Industrial Reports

Cotton Broad-Woven Goods

1965 and 1966

FOR RELEASE: February 23, 1968

SERIES: M22T.1(66)-4

The data shown in this report summarizes the information published in the quarterly M22T.1 series. Except for survey item codes 2402, 2404, 2644, and 2646, no revisions have been made in the detailed figures.

DESCRIPTION OF SURVEY

The statistics in this publication were published in Census quarterly series M22T.1, Cotton Broad-Woven Goods, from a sample of mills accounting for approximately 98 percent of the total U.S. production of cotton broad-woven goods. Estimates have been included for manufacturers whose reports were not received and are based on their production as reported in the 1965 annual survey.

The data in this report are not adjusted for seasonal variation or number of working days.

COVERAGE

The information contained in this report is collected on Census quarterly form M22T, "Broad Fabrics (Except Knit): Woven, Non-woven, and Felts." A separate report is requested from each mill, although in some instances the "mill" reported as one unit to the Census Bureau constitutes more than one location.

Fabrics woven on commission are reported in this series by the commission mill, not by the company for which the work is contracted.

REVISED COTTON CLASSIFICATIONS

The product classifications for cotton fabrics were revised substantially in 1966 in order to reflect current production and marketing categories more accurately. The 1966 statistics are thus not directly comparable to 1965 and previous years.

In this report, 1966 detailed data (with revisions where necessary) are shown in table 2A but 1965 figures comparable are shown in table 2B.

COVERAGE OF INDIVIDUAL TABLES

The production figures shown in tables 1 and 2 represent total production of the specified fabrics by all weaving mills regardless of their primary activity. However, because a single report is collected from an individual mill, the information shown in tables 3, 4, 5, and 6 relates to the entire activity of all mills primarily producing cotton fabrics. Insofar as these mills produced other fabrics (manmade fiber or wool) as a secondary product, the yarn consumption or loom activity for such fabrics would be included in this report. Similarly, the yarns consumed in the manufacture of cotton fabrics produced as a secondary product in a mill primarily producing manmade fiber fabrics is excluded from this report and included in the Current Industrial Reports publication relating to manmade fiber broad-woven fabrics.

Inquiries concerning these figures should be addressed to the U.S. Department of Commerce, Bureau of the Census, Industry Division, Washington, D.C. 20233.

U.S. DEPARTMENT OF COMMERCE Alexander B. Trowbridge, Secretary

William H. Shaw, Assistant Secretary, Economic Affairs

BUREAU OF THE CENSUS A. Ross Eckler, Director

WOOLEN AND WORSTED MILLS

Mills with woolen and worsted machinery which primarily produce manmade fiber fabrics do not report yarn consumption data. Separate data on knit cloth are published by the Bureau of the Census in quarterly series M22K, Shipments of Knit Cloth, Including Interplant Transfers, beginning with the fourth quarter 1966. Data are available upon request.

DEFINITION OF TERMS

Broad Fabrics--Fabric over 12" in width, as made.

Cotton Fabrics--Includes fabric wholly or chiefly by weight of cotton.

Blends, Chiefly Cotton--Includes fabrics chiefly by weight of cotton and containing other fibers, such as nylon, polyester, etc.

Blends and Mixtures--Fabrics which are made from more than one fiber are classified according to whether the fabric is chiefly cotton, wool, or manmade fiber. As examples, a fabric made of 55 percent cotton and 45 percent rayon is included in the cotton report; a fabric which is 40 percent cotton, 30 percent rayon, and 30 percent acetate is classified in the manmade fibers report. Blends and mixtures which are by weight 50 percent of one fiber and 50 percent of another fiber are classified according to the fiber of greatest value. As an example, a fabric which is 50 percent polyester and 50 percent cotton is classified as polyester. Fabrics which are 95 percent or more of one fiber are included in the 100 percent classification for that fiber.

ACKNOWLEDGMENTS--This report was prepared in the Industry Division under the direction of Robert J. Nealon, Chief, Foods, Textiles, and Apparel. Evelyn O. Denny, Chief, Textiles, assisted by Charles T. Lee, was directly responsible for the review of the data and preparation of the report.

Table 29.--PRODUCTION OF COTTON BROAD-WOVEN GOODS, BY TYPE, BY QUARTER: 1965--Continued

(Thousands of linear yards)

Type of goods	Reference list number	1965	1964			
			October-December	July-September	April-June	January-March
SHEETING AND ALLIED COARSE AND MEDIUM YARN FABRICS--Continued						
Carded poplins.....	1204	40,829	10,029	8,830	11,306	10,644
Three leaf herringbone twills (except jeans).....	1208	(D)	(D)	(D)	(D)	(D)
Drills.....	24,714	50,180	43,168	46,853	59,516
30" - 2.50 - all counts.....	1401	3,096	799	823	754	821
All other drills, 30" and narrower.....	1402	12,825	2,832	2,683	3,402	3,718
Drills over 30" but under 42".....	10,909	36,809	41,015	45,153	37,932
39" - 1.90-2.00 and pro-rata widths.....	1405	51,151	3,836	13,269	16,192	12,854
All other drills, over 30" but under 42".....	1407	103,758	27,493	27,741	38,961	25,078
Drills 48" and wider.....	19,872	16,840	18,647	17,344	17,047
59" - 1.85-2.25 and pro-rata widths.....	1409	29,712	7,557	7,587	6,402	7,666
All other drills over 48" wide.....	1411	40,164	9,283	11,000	10,442	9,381
Jeans (plain and herringbone).....	60,342	14,203	13,702	14,259	16,178
Under 36" wide.....	1416	(D)	(D)	(D)	(D)	(D)
38/39 - 96 x 66 - 2.25 and pro-rata widths to 40".....	1417	(D)	(D)	(D)	(D)	(D)
All other jeans, 36" and wider.....	1419	45,712	10,449	10,149	12,110	12,504
Three leaf pocketing twills and silesias (sheeting yarns).....	84,776	17,034	19,575	25,016	25,151
Under 40" wide.....	1421	51,228	5,372	7,276	9,280	8,694
40" and wider.....	1422	55,543	11,056	12,299	15,736	16,457
Four leaf twill fabrics.....	34,034	74,915	83,611	98,701	86,302
45/120 sley x 43/40 pick - under 43".....	10,433	1,404	21,809	29,537	31,513
44" 1.30-1.44 and pro-rata widths.....	1431	7,341	7,005	12,535	15,456	16,793
44" 1.50-1.89 and pro-rata widths.....	1432	20,426	2,509	3,938	7,369	6,610
44" 1.90 and lighter.....	1435	24,058	4,200	5,396	6,242	8,110
86/90 sley x 40/44 pick - under 43".....	1439	(D)	(D)	(D)	(D)	(D)
Four leaf herringbone twills.....	1447	(D)	(D)	(D)	(D)	(D)
All other four leaf twills.....	216,756	52,442	54,274	60,592	49,442
Under 48" wide.....	1449	114,246	24,872	26,271	32,402	30,136
48" and wider.....	1451	102,510	27,570	27,998	28,190	19,246
Sateens (sheeting yarns).....	34,438	20,520	20,823	19,606	24,907
Under 48" wide.....	1455	60,455	16,469	13,227	13,046	17,914
48" and wider.....	1457	34,292	13,052	7,596	6,560	7,023
Gabardines and cavalry twills (carded).....	1480	(D)	(D)	(D)	(D)	3,075
Birdseye diaper cloth.....	1483	84,715	13,965	19,707	22,143	22,850
Bed sheetings (42" and wider) muslin and carded percales.....	365,130	90,535	86,873	94,885	90,337
Sley of more than 64, including carded percales.....	1491	21,309	20,331	18,404	20,059	22,085
64 sley.....	1494	223,751	51,504	43,469	54,826	68,752
Sley of less than 64.....	1496					
Bedford cords (no colored yarn).....	1499	(D)	(D)	(D)	(D)	(D)
Pillow and industrial tubings.....	1502	(D)	(D)	(D)	(D)	2,689
All other sheetings yarn fabrics.....	1503	54,391	14,523	13,075	11,931	16,252
PRINT CLOTH YARN FABRICS (CARDED YARNS APPROXIMATELY 10 to 42)						
Window shade cloth.....	1506	51,441	14,240	13,803	13,543	15,656
Plain print cloths (total threads per square inch 10 to 14).....	1,201,250	198,456	187,015	305,132	312,042
45" - 64 x 64 - 4.75 yd.....	1507	52,413	13,510	14,107	14,477	15,024
45" - 60 x 48 - 5.35 yd.....	1508	3,004	7,500	7,365	10,010	10,341
39" - 80 x 60 - 4.70 yd.....	1509	(D)	(D)	(D)	(D)	(D)
Closely related subunits of 20" x 20" - 4.10 yd.....	1509	206,389	47,913	47,149	5,792	54,535
39" - 68 x 72 - 4.75 yd.....	1511	32,100	7,442	7,117	7,505	6,671
39" - 1 1/2" - 64 x 60 - 5.35 yd.....	1512	14,608	4,379	4,160	4,365	5,172
39" - 1 1/2" - 64 x 56 - 5.60 yd.....	1512	(D)	(D)	(D)	(D)	(D)
39" - 1 1/2" - 64 x 48 - 6.20 yd.....	1520	21,008	5,042	5,074	5,526	5,317
All other construction.....	74,130	202,220	193,000	160,000	204,112
Under 36" wide.....	1521	12,207	3,839	4,134	2,845	3,552
36" wide but under 42".....	1522	24,400	74,410	70,104	71,000	6,421
42" and wider.....	1523	47,523	124,993	118,762	123,155	124,139
Fancy print cloths.....	(D)	(D)	31,101	24,100	3,141
Gauze diaper cloth.....	1524	72,269	13,114	1,304	15,248	14,433
All other fancy print cloths, including sateen weaves.....	1525	(D)	(D)	1,331	7,644	6,723
Radiant cloth (total threads per square inch 10 to 14, all constructions).....	1526	10,134	4,022	3,917	4,341	4,300
Tobacco and cheese cloth (total threads per square inch 10 and under).....	1,112,124	101,543	86,144	275,281	345,420
All widths 20" 1. construction.....	1527	3,134	7,104	6,503	24,200	6,742
All widths 17 1/2" sley x 12 1/4 pick.....	1527	3,146	7,104	6,503	7,391	5,113
All other constructions.....	1528	505,420	112,453	111,137	135,144	141,765

See footnotes at end of table.

Table 2P--PRODUCTION OF COTTON BROAD-WOVEN GOODS, BY TYPE, BY QUARTER: 1965--Continued

(Thousands of linear yards)

Type of goods	Reference list number	1965	1965 ¹			
			October-December	July-September	April-June	January-March
PRINT CLOTH YARN FABRICS (CARDED YARNS APPROXIMATELY 28s to 42s)--Continued						
Carded broadcloth--all widths.....	389,379	94,135	92,785	99,448	103,011
10 ⁴ x 58.....	1367	64,590	14,902	20,519	13,733	15,186
98/100 x 58, eo.....	1367	(D)	(D)	(D)	(D)	(D)
80 x 54, eo.....	1369	(D)	(D)	(D)	(D)	(D)
All other carded broadcloth constructions (including slub yarns)	1371	222,480	55,727	47,498	59,612	9,433
Carded poplins (print cloth warp yarn, including slub yarn).....	1378	49,510	11,557	11,309	13,274	13,296
Three leaf twills (print cloth yarns).....	1382	42,615	9,770	9,419	11,060	12,366
All other print cloth yarn constructions.....	1387	(D)	(D)	4,952	5,839	5,151
COLORED YARN FABRICS.....						
Denims, clothing (basis 28" width).....	257,785	56,070	53,403	69,597	78,715
1.60 yd. and 2.00 yd.....	1401	39,118	19,951	17,930	25,443	25,814
2.20 yd.....	1406	44,556	9,431	10,791	10,044	14,290
2.45 and 3.00 yd.....	1411	22,872	4,364	4,184	5,333	8,991
All other clothing denims.....	1410	100,735	22,344	20,498	28,777	29,116
Cottonades, suiting coverts, pin stripes, pin checks, hickory stripes, etc.....	1422	23,954	5,545	6,035	6,221	5,854
Whipcords, Bedford cords, shirting coverts, (twill and plain weave)	1432	(D)	(D)	(D)	(D)	(D)
Chambrays and colored yarn shirtings (carded yarns).....	(D)	(D)	(D)	(D)	(D)
3" - 3.00 yd.....	1441	-	-	-	-	-
All other carded yarn chambrays and shirtings.....	1440	(D)	(D)	(D)	(D)	(D)
Ginghams (except combed, part combed, and fine carded).....	1455	(D)	(D)	(D)	(D)	(D)
Seersuckers (except combed, part combed, and fine carded).....	1456	-	-	-	-	-
All other carded suiting woven with colored yarns.....	78,747	16,219	17,617	21,291	23,520
All cotton.....	1461	(D)	(D)	(D)	(D)	(D)
Cotton and rayon and/or acetate, and cotton and wool mixtures (51 percent or more cotton).....	1467	(D)	(D)	(D)	(D)	(D)
Bed tickings woven, all constructions.....	1472	68,307	16,618	16,681	17,045	17,963
TOWELS, TOWELING, AND DISHCLOTHS.....						
Turkish and terry woven (including wash cloths and bathmats).....	1519	518,400	130,372	121,405	133,276	130,147
All cut mark or border towels, other than terry.....	1522	64,440	15,875	14,142	17,249	17,231
Cabinet and other continuous length toweling other than terry.....	1535	132,665	35,076	32,254	33,271	32,064
NAILED FABRICS, BLANKETS AND BLANKETING.....						
Thermal blanketing.....	1601	9,845	2,417	2,119	2,574	2,735
Crib blanketing, all cotton and chiefly cotton.....	1607	1,479	1,462	1,479	1,633	1,709
Blanketing, other than crib.....	25,901	5,744	5,911	7,351	6,685
Electric blanket shells.....	1608	-	-	-	-	-
Other blanketing.....	25,091	5,744	5,911	7,351	6,685
100 percent cotton.....	1609	(D)	(D)	(D)	(D)	(D)
Cotton blends, chiefly cotton.....	1611	(D)	(D)	(D)	(D)	(D)
Outing flannels.....	1612	(D)	(D)	(D)	16,011	16,480
Work shirt flannels.....	1616	-	-	-	-	-
Canton flannels.....	1616	40,562	10,602	11,533	13,515	13,421
Interlining flannels.....	1612	(D)	(D)	(D)	3,870	3,229
All other napped fabrics.....	1620	9,507	2,223	2,422	2,614	2,302
FINE COTTON FABRICS (COMBED AND FINE CARDED).....						
Combed.....	1,281,932	314,841	300,818	342,338	341,079
Broadcloth.....	(D)	(D)	(D)	44,725	48,243
40" 13 x 60.....	1802	-	-	-	-	-
All other combed broadcloth.....	1802	(D)	(D)	(D)	(D)	(D)
Dimities and fancy handkerchief fabrics.....	1811	(D)	(D)	(D)	(D)	(D)
Lawns and organdies.....	104,114	42,968	37,701	44,111	44,104
40" 28 x 28 - 3.00 yd.....	1820	11,701	3,792	3,219	3,111	2,208
All other combed lawns.....	1820	144,405	40,005	34,482	39,682	36,982
Marquises.....	1824	(D)	(D)	(D)	(D)	(D)
Organdies (other than combed).....	1825	80,401	11,300	9,314	11,111	14,821
Liques.....	1826	(D)	(D)	(D)	(D)	(D)
Poplins.....	1830	41,633	12,192	11,753	14,911	14,117
Sateens.....	1830	14,102	3,480	3,001	3,111	3,212

pins down data for counties

*Compiled by
the
Nation's
Fact Finder*

County Business Patterns highlights the data businessmen, market researchers, and industrial and civic planners need for counties, standard metropolitan statistical areas, and States. Principal data items covered are employment, taxable payrolls, and the number and employment-size of reporting units for commercial and industrial organizations. Data are presented in individual paper-bound reports for States and for the United States. Prices vary for individual reports. Computer tapes and punchcards are also available. For further information, write to Bureau of the Census, Washington, D.C., 20233, or any Department of Commerce field office.
